First quarter 1981

Premier trimestre 1981

## Note

This and other government publications may be purchased from local authorized agents and other community bookstores or by mail order.

Mail orders should be sent to Publication Sales and Services, Statistics Canada, Ottawa, K1A 0V7, or to Publishing Centre, Supply and Services Canada, Ottawa, K1A 0S9.

Inquiries about this publication should be addressed to:

Financial Flows Section,  
Financial Flows and Multinational Enterprises  
Division,

Statistics Canada, Ottawa, K1A 0T6 (telephone: 995-0851) or to a local Advisory Services office:

|                    |            |
|--------------------|------------|
| St. John's (Nfld.) | (737-4073) |
| Halifax            | (426-5331) |
| Montréal           | (283-5725) |
| Ottawa             | (992-4734) |
| Toronto            | (966-6586) |
| Winnipeg           | (949-4020) |
| Regina             | (359-5405) |
| Edmonton           | (420-3027) |
| Vancouver          | (666-3695) |

Toll-free access to the regional statistical information service is provided in Nova Scotia, New Brunswick, and Prince Edward Island by telephoning 1-800-565-7192. Throughout Saskatchewan, the Regina office can be reached by dialing 1(112)800-667-3524, and throughout Alberta, the Edmonton office can be reached by dialing 1-800-222-6400.

## Nota

On peut se procurer cette publication, ainsi que toutes les publications du gouvernement du Canada, auprès des agents autorisés locaux, dans les librairies ordinaires ou par la poste.

Les commandes par la poste devront parvenir à Ventes et services de publications, Statistique Canada, Ottawa, K1A 0V7, ou à Imprimerie et édition, Approvisionnement et Services Canada, Ottawa, K1A 0S9.

Toutes demandes de renseignements sur la présente publication doivent être adressées à:

Section des flux financiers,  
Division des flux financiers et des entreprises multinationales,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 995-0851) ou à un bureau local des Services consultatifs situé aux endroits suivants:

|                    |            |
|--------------------|------------|
| St. John's (T.-N.) | (737-4073) |
| Halifax            | (426-5331) |
| Montréal           | (283-5725) |
| Ottawa             | (992-4734) |
| Toronto            | (966-6586) |
| Winnipeg           | (949-4020) |
| Regina             | (359-5405) |
| Edmonton           | (420-3027) |
| Vancouver          | (666-3695) |

On peut obtenir une communication gratuite avec le service régional d'information statistique de la Nouvelle-Écosse, du Nouveau-Brunswick et de l'Île-du-Prince-Édouard en composant 1-800-565-7192. En Saskatchewan, on peut communiquer avec le bureau régional de Régina en composant 1(112)800-667-3524, et en Alberta, avec le bureau d'Edmonton au numéro 1-800-222-6400.

## Symbols

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
  - nil or zero.
- - amount too small to be expressed.
- P preliminary figures.
- † revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

## NOTE ON CANSIM

Complete historical quarterly series for the financial flows are available on CANSIM and cover the period from the first quarter of 1962 to the present. Data for the current quarter are placed on CANSIM at approximately the same time as the *Second Advance Release of the Financial Flow Accounts* and approximately one month prior to the main quarterly publication. Advance Releases for the Financial Flow Accounts are available upon request free of charge and do not automatically accompany a subscription to the main publication.

## Obtaining Consistent Time Series

Consistent time series cannot be obtained by piecing data together from successive issues of the Financial Flow Accounts. The volume of data that form the raw ingredients of the accounts and the frequency of revisions in these data make it difficult to maintain time series that are both consistent and up-to-date in printed form available to the public. For certain types of research it is not necessary to have the latest quarter's or year's data and use can be made of historical publications such as Catalogue 13-563 which contains annual flows and year-end stocks. For other types of work, or certain types of current analysis, the length of the series is not critical and the current quarterly publication and advance releases can be used. If the requirement is for data which contains the latest revisions and which covers a more lengthy period than the current publication it is advisable to use CANSIM.

The financial market summary table is now available on CANSIM in table format. For further information contact CANSIM (telephone: 995-7406) or G. Gravel (telephone: 995-0851).

## Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer
  - néant ou zéro.
- - nombres infimes.
- P nombres provisoires.
- † nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

## NOTE CONCERNANT CANSIM

Les séries chronologiques et trimestrielles complètes des flux financiers sont disponibles à partir de CANSIM pour la période s'étendant du premier trimestre 1962 jusqu'à aujourd'hui. Les données du trimestre en cours sont mises sur CANSIM en même temps, approximativement, que le *Communiqué anticipé n° 2*, soit environ un mois avant la principale livraison trimestrielle. Les Communiqués anticipés des Comptes des flux financiers sont disponibles sur demande, sans frais; les abonnés à la publication principale doivent en faire la demande expresse, s'ils désirent la recevoir.

## Obtention des séries chronologiques cohérentes

On ne peut pas obtenir des séries chronologiques cohérentes en réunissant simplement les données de publications successives des Comptes des flux financiers. Du fait du volume des données brutes qui entrent dans la composition des comptes et de la fréquence des révisions à effectuer sur ces données, il est difficile d'avoir des séries chronologiques qui soient à la fois cohérentes et à jour dans leur version imprimée destinée au grand public. Certes, certaines recherches n'obligent pas à avoir les chiffres du dernier trimestre ou de la dernière année, et il est alors possible de se référer aux publications à caractère plus historique, comme le n° 13-563 au catalogue qui présente les flux annuels et les encours de fin d'année. Par contre, pour certains travaux et certaines formes d'analyses de conjoncture, la longueur de la série n'est pas essentielle, et on peut se servir de la publication trimestrielle courante et des communiqués préliminaires. Dans les cas où les données doivent avoir été soumises aux réunions les plus récentes et couvrir une période plus longue que celle visée par les publications courantes, il est conseillé d'avoir recours à CANSIM.

Le tableau sommaire du marché financier est maintenant disponible sur CANSIM. Toutes demandes de renseignements doivent être adressées à CANSIM (téléphone: 995-7460) ou à G. Gravel (téléphone: 995-0851).

## FINANCIAL ACTIVITY IN CANADA

### An Overview

In the first quarter of 1981, non-financial sectors of the Canadian economy raised \$17,875 million on conventional credit markets, compared with \$13,361 million in the same quarter the year earlier. These funds amounted to 24.1% of the final value of goods and services produced in the period, up from 20.3% in the first three months of 1980.

Figure 1

**Total Borrowing by Domestic Non-financial Sectors as a Percentage of Gross National Product**  
**Total des emprunts par le secteur interne non-financier en pourcentage du produit national brut**

Non-financial private corporations accounted for 49% of the funds so raised, up from 40% in the equivalent period in 1980. General government (i.e., federal, provincial and municipal governments - Sectors X and XI) accounted for 12%, under half the proportion of 27% in the first three months of 1980. The chartered banks registered the most significant change in providing funds to conventional credit markets, increasing their share to 42% from 18%, while the proportion provided by non-residents was halved from 17% to 8%. The share supplied by other private domestic financial institutions fell slightly, to 41%.

The proportion of funds raised by domestic non-financial sectors via the various financial instruments changed sharply from the period 12 months earlier. Whereas bonds and mortgages were the preferred form of financing in the first quarter of 1980 with each accounting for about one quarter of the total, in the first three months of 1981, bank loans dominated funds raised on conventional credit markets. Similarly, equity issues increased their proportion from 9% to 14%. The use made of mortgages and bonds fell sharply, to 14% and 18%, respectively.

## L'ACTIVITÉ FINANCIÈRE AU CANADA

### Vue d'ensemble

Au premier trimestre de 1981, les secteurs non financiers de l'économie canadienne ont réuni \$17,875 millions sur les marchés de crédit ordinaires, contre \$13,361 millions au même trimestre l'année précédente. Ces capitaux représentent 24.1% de la valeur finale des biens et services produits au cours de cette période, soit une légère augmentation par rapport aux trois premiers mois de 1980.

Les sociétés privées non financières ont représenté 49 % des capitaux empruntés, comparativement à 40 % pour la période correspondante en 1980. Les administrations publiques (c.-à-d. les administrations fédérale, provinciales et municipales - Secteurs X et XI), sont à l'origine de 12 % des fonds empruntés, comparativement à 27 % pour les trois premiers mois de 1980. Ce sont les banques à charte qui ont le plus augmenté leur part du financement sur les marchés de crédit ordinaires, puisque cette dernière passe de 18 % à 42 %, tandis que la part des non-résidents diminue de moitié pour tomber de 17 % à 8 %. La part des autres institutions financières privées canadiennes a légèrement diminué pour se situer à 41 %.

La proportion des capitaux utilisés par les secteurs domestiques non-financiers au moyen des divers instruments financiers s'est beaucoup modifiée par rapport à la même période 12 mois plus tôt. Tandis que les obligations et les hypothèques étaient les formes préférées de financement au premier trimestre de 1980 et intervenaient chacune pour 25 % environ du total, les prêts bancaires ont dominé les marchés de crédit ordinaires au cours des trois premiers mois de 1981. La part des émissions d'actions est passée de 9 % à 14 %. Le recours aux hypothèques et aux obligations a diminué fortement et leurs parts ont atteint 14 % et 18 % respectivement.

The Financial Market Summary Table compresses the abundance of detail presented in the Financial Flows sector tables by aggregating sectors and by deleting non-market instruments such as trade credit and claims on associated enterprises. The Table also provides a useful approximation to final borrowing via financial markets (i.e. the organized markets for security issues and negotiated loans) and avoids double counting of the intermediary borrowing and re-lending of financial institutions. Line 5 (Total Borrowing by Domestic Non-Financial Sectors) provides the unduplicated total which serves as a simple summary statistic of domestic credit market activity. The addition of the Rest of the World and Financial Institutions (lines 6 and 8) completes the system and consequently line 9 (Total Funds Raised = Total Funds Supplied) reflects the basic identity that the change in liabilities, summed across sectors, for an instrument or instruments equals the change in assets, summed across sectors, for the same instrument or instruments. Further discussion of the Table is contained in an article published in Financial Flow Accounts, Second Quarter 1976 and in the Canadian Statistical Review, March 1977.

(1) Since Sector XII, Social Security Funds, has been consolidated with General Government, the holdings by the Funds of Provincial and Federal Government bond debt are netted out: the asset bond figure (category 2420) for Sector XII is subtracted from the sum of the liability bond figure for Sectors X (Federal Government) plus XI (Provincial and Local Governments and Hospitals).

(2) Separate figures for the share liabilities of the Rest of the World (Sector XIII) are not available but, since Foreign Investments (category 3530) consists mostly of shares, it is included with Stocks, (category 3520).

(3) The Stock figure included in Sector I and II is the true residual of category 3520, i.e. it is the sum of category 3520 (the stock liability) less the sum of category 2520 (the stock asset) for sectors III through XIII. This procedure is necessary to ensure the balance between total funds supplied and raised in line 9. In the main Financial Flows Matrix the sum across sectors of corporate claims plus stocks on the liability side equals the sum of the two on the asset side; however, stocks alone do not balance because stocks on the liability side include shares issued to associated enterprises (included in corporate claims on the asset side).

Le Tableau sommaire du marché financier comprime les renseignements détaillés figurant dans les tableaux sectoriels des comptes de flux financiers par l'agrégation des secteurs et la suppression des instruments hors marché tels que les effets commerciaux et les engagements sur entreprises associées. Le tableau permet également d'avoir une approximation utile des emprunts finals sur les marchés financiers (c'est-à-dire les marchés organisés pour les émissions de valeurs et les prêts négociés) tout en évitant le double compte des emprunts intermédiaires et les seconds prêts des institutions financières. La ligne 5, Total des emprunts des résidents canadiens à l'exclusion des institutions financières, donne un total sans double compte qui est une statistique récapitulative simple de l'activité sur le marché intérieur du crédit. Le reste du monde et les institutions financières (lignes 6 et 8) viennent compléter le système, et la ligne 9 (Total des fonds empruntés = total des fonds offerts) rend compte de l'identité fondamentale selon laquelle la variation des éléments de passif, après sommation par secteur, pour un ou des instruments, est égale à la variation des éléments d'actif, après sommation par secteur, pour le ou les mêmes instruments. Le tableau explicatif fait l'objet d'un article paru dans le numéro du deuxième trimestre de 1976 de Comptes des flux financiers et celui de mars 1977 de la Revue statistique du Canada.

1) Comme le secteur XII, Caisses de sécurité sociale, a été consolidé avec l'Administration publique générale, les avoirs d'émissions obligataires des administrations fédérale et provinciales de ce secteur sont calculés par déduction: on déduit le chiffre des obligations (catégorie 2420) pour le secteur XII de la somme des chiffres correspondants au passif des secteurs X (Administration publique fédérale) plus XI (Administrations publiques provinciales et locales et hôpitaux).

2) On ne dispose pas de chiffres distincts sur le passif sous forme de parts du secteur XIII (Reste du monde), mais comme ces dernières représentent la plus grande partie des investissements étrangers (catégorie 3530), cet élément est compris dans les actions (catégorie 3520).

3) Le chiffre pour les actions figurant au secteur I et II est le résidu vrai de la catégorie 3520, c'est-à-dire qu'il est la somme de la catégorie 3520 (Passif-actions) moins la somme de la catégorie 2520 (Actif-actions) des secteurs III à XIII. Cette opération est nécessaire pour garantir l'équilibre entre le total des fonds empruntés et le total des fonds offerts (ligne 9). Dans la matrice des flux financiers, la somme des engagements des entreprises constituées par secteur plus les actions du côté du passif est égale à la somme des deux du côté de l'actif. Toutefois, les totaux pour les actions proprement dites ne correspondent pas car les actions du côté du passif comprennent les parts émises aux entreprises associées (qui sont comprises dans les créances des entreprises constituées du côté de l'actif).

Factors affecting financial activity during the first quarter of 1981 included: a relatively strong increase in Canada's gross national product; reduced net savings by the corporate sectors despite a slight increase in profits;<sup>1</sup> a sharp deterioration in the current account of Canada's balance of international payments; a reduced deficit by the federal government; a large surplus for the provincial governments; a reduction in the money supply (M1), and high rates of interest; rising energy costs, contributing to rapidly rising consumer prices.

Les facteurs qui ont marqué l'activité financière au premier trimestre de 1981 ont été: une augmentation assez forte du produit national brut du Canada; une réduction de l'épargne nette des sociétés malgré une légère hausse des profits<sup>1</sup>; une importante détérioration du compte courant de la balance canadienne des paiements internationaux; une réduction du déficit du budget fédéral; de gros excédents pour les budgets provinciaux; une diminution de la masse monétaire (M1) et des taux d'intérêt élevés, et une hausse des coûts énergétiques qui contribuent à l'augmentation rapide des prix à la consommation.

## Economic Activity

Despite experiencing very high rates of interest and a restrictive monetary policy, Canada's Gross National Product rose 14.4% in nominal terms while, in real terms, the increase amounted to 4% (seasonally adjusted at annual rates). The relative strength in the economy was fuelled by continuing strength in gross fixed capital formation by non-financial corporations (both public and private), and rises in the level of non-farm inventories and housing starts. Offsetting these positive influences were sharp declines in the net savings of non-financial private corporations and a worsening of Canada's deficit on current account transactions with non-residents.

Housing starts averaged 191,000 (seasonally adjusted annual rate), up from 158,000 starts for the year 1980. While the improvement marked a

## L'activité économique

En dépit de taux d'intérêt très élevés et d'une politique monétaire restrictive, le produit national brut du Canada s'est accru de 14.4 % en valeur nominale et de 4 % en valeur réelle (après désaisonnalisation au taux annuel). La fermeté soutenue de la formation brute de capital fixe des sociétés non financières publiques et privées et les augmentations des stocks non agricoles et des mises en chantier de logements ont contribué à cette vigueur relative de l'économie. Par contre, l'épargne nette des sociétés privées non financières a baissé fortement et le déficit au compte courant au titre des opérations avec les non-résidents s'est détérioré.

Les mises en chantier de logement se sont élevées à 191,000 unités en moyenne (après désaisonnalisation au taux annuel), contre 158,000 unités en 1980. Bien que

<sup>1</sup> Net Savings in the Financial Flow Accounts are net of dividends and taxes.

<sup>1</sup> L'épargne nette qui figure aux comptes des flux financiers ne comprend ni les dividendes ni les impôts.

turnaround from a four-year decline in the housing market, the number of starts remained substantially below the peak year of 1976. The search for protection from the loss of value of financial assets in an inflationary period may have encouraged homebuyers to purchase, tending to exert upward pressure on house prices in some major urban centres. This shift into real assets may have been discouraged, at least in part, by the rising cost of mortgage money.

Expenditures on plant and equipment rose strongly, despite continued weakness in corporate profits. Much of the increase appeared to be fuelled by non-residential construction. Among the industries indicating strong accumulation of fixed assets were mineral fuels, paper and printing, primary metals and metal fabricating, petroleum and coal and pipelines.

Personal disposable income rose about 14.5% (seasonally adjusted annual rate). With personal expenditures rising on the same order, the personal savings rate remained unchanged at 10.3%. (This compares with a rate of 4.7% in the United States).

### **Interest Rates, Capital Markets and Monetary Aggregates**

The first quarter of 1981 saw a slight easing of interest rates at the short end of the market, while yields on longer term instruments rose, flattening somewhat the inverse yield curve that had reappeared in the fourth quarter of 1980. The Bank Rate fell 57 basis points over the quarter, closing March at 16.69%. This decline was more a reflection of a much greater drop in yields on short-term paper in the United States than a change in direction in the Bank of Canada's restrictive monetary policy. This policy, aimed at reducing the rate of inflation, was reconfirmed in February by the announcement of a new target range for the growth of M1. The new range is between 4% and 8% based on the three months centred on September 1980; the former range had been between 5% and 9% based on the average for the second quarter of 1979.<sup>2</sup> The new range is slightly lower than the centre of the previous one, intended to reflect the extent to which deposits previously included in M1

cette amélioration renverse la tendance à la baisse qui persiste depuis quatre ans dans le secteur de l'habitation, le nombre de mises en chantier reste sensiblement inférieur au chiffre record qui a été enregistré en 1976. Les consommateurs ont peut-être cherché à se protéger contre la perte de valeur des avoirs financiers en période d'inflation en achetant des maisons, ce qui a exercé une pression à la hausse sur les prix des maisons dans certains grands centres urbains. Ce déplacement vers les actifs immobiliers a peut-être été découragé, du moins en partie, par l'augmentation du coût des prêts hypothécaires.

Les dépenses en usines et en matériel ont connu une forte hausse en dépit de la faiblesse persistante des profits des sociétés. La plus grande partie de l'augmentation est attribuable, semble-t-il, à la construction non résidentielle. Parmi les secteurs qui présentent une accumulation de leur actif immobilisé figurent les combustibles minéraux, le papier et l'impression, la première transformation des métaux et la fabrication de produits en métal, le pétrole et le charbon et les pipe-lines.

Le revenu personnel disponible a progressé de 14.5 % (après désaisonnalisation au taux annuel). Les dépenses personnelles ont augmenté dans la même proportion, ce qui s'est traduit par un taux d'épargne inchangé (10.3 %). Ce taux est de 4.7 % aux États-Unis.

### **Taux d'intérêt, marchés de capitaux et agrégats monétaires**

Au cours du premier trimestre de 1981, les taux d'intérêt à court terme ont légèrement diminué tandis que les rendements sur les instruments à long terme ont augmenté. Ces mouvements des taux ont eu pour effet d'aplanir la courbe inverse de rendement qui était réapparue au quatrième trimestre de 1980. Le taux d'escompte de la Banque du Canada a baissé de 67 points de base durant le trimestre et a clôturé à 16.59 % en mars. Cette diminution traduit davantage une baisse beaucoup plus prononcée des taux sur le papier à court terme aux États-Unis qu'un changement d'orientation dans la politique de restriction monétaire pratiquée par la Banque du Canada. Cette politique, qui vise à réduire le taux d'inflation, a été confirmée en février lorsque la Banque a annoncé l'adoption d'une nouvelle fourchette de croissance visée pour M1. La nouvelle fourchette varie entre 4 % et 8 % et se fonde sur les trois mois centrés sur septembre 1980. L'ancienne fourchette allait de 5 % à 9 % et se fondait sur la moyenne du deuxième trimestre de 1979<sup>2</sup>. La nouvelle fourchette est légèrement inférieure au centre de

<sup>2</sup> The Federal Reserve Board in the United States announced in February a new target range for the rate of growth of the money supply. Both M1A and M1B, the nearest equivalent to Canada's definition of M1, were targeted to grow between 3.0% and 5.5%.

<sup>2</sup> En février, la Réserve fédérale américaine a fixé une nouvelle fourchette de croissance visée pour la masse monétaire. La croissance M1A et M1B, les plus proches équivalents de M1 au Canada, devra osciller entre 3.0 % et 5.5 %.

**Figure III**  
**Money Supply<sup>(1)</sup> and Target Growth Rates (Seasonally Adjusted)**

**L'offre de monnaie<sup>(1)</sup> et la fourchette des taux de croissance visés (Données désaisonnalisées)**

(1) Currency outside banks plus Canadian dollar demand deposits at chartered banks. — Pièces métalliques et papier-monnaie hors-banque, plus les dépôts à vue libellés en dollars canadiens auprès des banques à charte.

M1 weakened in the first quarter, falling 1.3% (seasonally adjusted annual rate) but remained well within the target band, despite the relative strength of the Canadian economy and exceptional growth in bank lending. By comparison, M2 and M3 grew very strongly (10.1% and 20.8%, respectively), reflecting the higher interest yields available on instruments included in these aggregates, compared with the lower or zero interest rates available on the items included in M1.

The decline in M1, coupled with continuing growth of nominal GNP, resulted in a rise in the velocity of money. Defining the velocity of money to be Gross National Product divided by M1, we find that this rise is a continuation of an upward trend over the past few years. (See Figure IV.) However, the growth of M2 has outstripped that of GNP, with the result that the opposite trend is produced.

The widening of the yield differential on short-term paper between Canada and the United States was very sharp. For example, the yield differential on 30-day commercial paper rose from two basis

M1 a diminué de 1.3 % au premier trimestre (après désaisonnalisation au taux annuel) mais s'est maintenu bien en deçà de la fourchette visée malgré la fermeté relative de l'économie canadienne et la croissance exceptionnelle des prêts bancaires. Par contre, M2 et M3 se sont accrus fortement (10.1 % et 20.8 % respectivement), en raison des rendements élevés des instruments qu'englobent ces agrégats par rapport aux intérêts faibles ou inexistants servis sur les postes compris dans M1.

La baisse de M1 combinée à la croissance continue du PNB en valeur nominale s'est soldée par une hausse de la vélocité de la monnaie. Si l'on définit la vélocité comme le produit national brut divisé par M1, ou s'aperçoit que cette augmentation marque la poursuite de la hausse observée au cours des dernières années (Voir la figure IV.) Toutefois, la croissance de M2 a dépassé celle du PNB, ce que se traduit par une tendance à la baisse.

L'élargissement du différentiel de rendement sur le papier à court terme au Canada et aux États-Unis a été très marqué. Ainsi, le différentiel sur le papier commercial à 30 jours est passé de deux points de base à la fin de

points at the end of 1980 to 383 basis points at the end of March 1981. A less extreme widening occurred on longer term instruments. This increased incentive for investing in Canada was reflected in

1980 à 383 points à la fin de mars 1981. Le différentiel n'a pas augmenté autant dans le cas des instruments à plus long terme. La hausse de l'attrait des investissements au Canada s'est répercutée sur la valeur du dollar canadien

the external value of the Canadian dollar, vis-à-vis its United States counterpart. The Canadian dollar rose moderately, from 83.77 cents U.S. at the end of 1980 to 84.44 cents U.S. by the end of the first quarter although it weakened to 82.69 cents U.S. in February. Higher yields in Canada prompted borrowers in this country to turn to foreign markets: of net new issues<sup>3</sup> placed in the first quarter, 30% was sold to non-residents, up from 15% in the last quarter of 1980. The resulting inflow of funds provided support for the Canadian currency. The alleviation of downward pressure on the dollar's external value allowed the Government of Canada to repay the U.S. \$300 million balance outstanding on its line of credit with Canadian chartered banks.

The impact of the new Bank Act began to be felt during the first quarter, most notably the new requirement that foreign currency deposits booked in Canada by residents of Canada are reser-

vis-à-vis la devise américaine. Le dollar canadien a augmenté de façon modérée, passant de 83.77 cents É.-U. à 84.44 cents É.-U. à la fin du premier trimestre, tandis qu'il tombait à 82.69 cents É.-U. en février. Les rendements élevés au Canada ont incité les emprunteurs canadiens à se tourner vers les marchés étrangers: au premier trimestre, 30 % des émissions nettes de nouvelles obligations<sup>3</sup> ont été vendues à des non-résidents, contre 15 % au dernier trimestre de 1980. L'entrée de capitaux qui en est résultée a contribué à soutenir le dollar canadien. Le relâchement de la pression à la baisse sur la valeur du dollar canadien a permis au gouvernement canadien de rembourser le solde de \$300 millions É.-U. qui restait sur sa ligne de crédit auprès des banques à charte canadiennes.

Les effets de la nouvelle Loi sur les banques ont commencé à se faire sentir au premier trimestre, et tout particulièrement la nouvelle disposition qui oblige les banques à tenir compte des dépôts en monnaie étrangère

<sup>3</sup> Net issues are defined as gross new bonds less retirements, excluding net sales of Canada Savings Bonds and issues to the Canada Pension Plan.

<sup>3</sup> Les émissions nettes correspondent à la valeur brute des nouvelles obligations moins les remboursements, les ventes nettes d'obligations d'épargne du Canada et les émissions destinées au Régime de pensions du Canada.

vable. By comparison, non-resident foreign currency deposits booked in Canada and resident deposits booked abroad are non-reservable. It would appear that there has resulted a large change in the booking of these liabilities in that non-resident branches' claims on head office rose sharply while foreign currency deposits, booked in Canada, fell by a similar amount. (See Text Table III.) The size of the movements and the present data difficulties in tracing the asset holders who have booked their deposits abroad have contributed significantly to the large discrepancy in The Rest of the World Sector.

détenus par les résidents canadiens dans le calcul de leurs réserves. Par contre, les dépôts en monnaie étrangère enregistrés au Canada et détenus par des non-résidents et les dépôts détenus à l'étranger par les résidents ne sont pas pris en compte lors de ce calcul. Il semblerait que la nouvelle disposition ait entraîné des modifications importantes dans l'enregistrement de ces engagements puisque les créances des succursales non résidentes sur le siège social ont augmenté fortement tandis que les dépôts en monnaie étrangère enregistrés au Canada ont baissé dans la même proportion. (Voir le tableau explicatif III.) L'ampleur des mouvements et les problèmes que nous éprouvons actuellement à retrouver les détenteurs de créances qui ont enregistré leurs dépôts à l'étranger ont contribué pour une part importante à la grande divergence qui subsiste dans le secteur du Reste du monde.

**Note:** To arrive at the net foreign asset position presented in the Bank of Canada Review in Table 15, item B1809, it is necessary to add the net foreign assets of foreign branches of Canadian Chartered banks to the net foreign asset position stated above. For a more detailed explanation of this table see the article "A Comparison of the Foreign Currency Position of Chartered Banks as Presented in the Financial Flow Accounts, the Balance of Payments and the Bank of Canada Review", *Financial Flow Accounts*, first quarter 1980.

**Nota:** Pour obtenir les avoirs nets en monnaies étrangères tel que présentés dans la Revue de la Banque du Canada au tableau 15, catégorie B1809, il faut ajouter à ces avoirs nets en Monnaies étrangères, ceux des succursales étrangères des banques à charte canadiennes. Pour une analyse plus détaillée de ce tableau veuillez consulter l'article "Comparaison de la position en devises étrangères des banques à charte dans les Comptes des flux financiers, la Balance des paiements et la Revue de la banque du Canada", *Comptes des flux financiers* premier trimestre 1980.

## Credit Market Developments

## Évolution du marché du crédit

### Short-term Paper and Treasury Bills

### Papier à court terme et bons du Trésor

Short-term paper outstanding rose \$714 million in the first quarter, a sharp reduction from \$1,617

Le papier à court terme en cours a augmenté de \$714 millions au premier trimestre, ce qui représente une forte

million in first quarter of 1980, but almost double net new sales in the fourth quarter of 1980.

The relative decline in the use of short-term paper over the past two-quarters appears to be related to the interest rate differential between short-term paper and bank borrowing. These types of financing are close substitutes and a change in their relative prices will encourage a shift in financing vehicle. Bankers acceptances usually cost between 100 and 200 basis points less than the prime rate, but given the stamping fee on the former, the cost to the borrower is comparable. Any movements away from the norm can be expected to produce a shift between them as can be seen from Figure VI.

Government of Canada treasury bills outstanding continued to increase sharply, \$1,035 million in the first quarter, roughly the same as in previous quarters. Treasury bills accounted for 42% of the federal government's increase in liabilities. The increased use of treasury bills in recent years appears to be a reflection of the overall market sentiment in an inflationary period. Both borrowers and lenders wish to stay short.

## Loans

Bank loans experienced their strongest quarter on record, rising \$8,943 million, almost a fourfold increase over the first three months of 1980. The exceptional rise was principally attributable to borrowing by three sectors, and was achieved despite the repayment of the outstanding balance of U.S. \$300 million on the Government of Canada's stand-by credit for bolstering Canada's international reserve position. The main borrowers were non-residents (\$712 million), federal government non-financial enterprises (\$1,495 million which was more than accounted for by the Canadian Wheat Board's financing of payments to farmers), and non-financial private corporations. These latter borrowed \$3,387 million in bank loans, with the increase being broadly based, though petroleum and coal and small corporations in the retail and service industries borrowed more than others. The high amount of borrowing by non-residents during the quarter may have reflected the lower prime rate in Canada than in the United States that persisted for most of the quarter.

baisse par rapport à l'accroissement de \$1,617 millions observé au premier trimestre de 1980 mais correspond à près du double des nouvelles ventes nettes réalisées au quatrième trimestre de 1980.

La baisse relative du papier à court terme au cours des deux derniers trimestres est reliée, semble-t-il, au différentiel des intérêts sur le papier à court terme et les prêts bancaires. Ces deux catégories de financement sont de très proches substituts et une variation de leur prix relatif encourage leur substitution. Le taux des acceptations bancaires est généralement inférieur de 100 à 200 points de base au taux de base, mais, vu leurs frais d'estampillage, le coût est à peu près le même pour l'emprunteur. On peut s'attendre à ce que toute fluctuation par rapport à la norme provoque un déplacement en faveur de l'un des deux, comme le montre la figure VI.

Les bons du Trésor en cours du gouvernement canadien ont poursuivi leur forte progression, en hausse de \$1,035 millions au premier trimestre, soit environ la même augmentation que les trimestres précédents. Les bons du Trésor ont représenté 42 % de la hausse globale des engagements de l'administration fédérale. Le recours accru aux bons du Trésor au cours des dernières années semble traduire l'attitude globale des emprunteurs à l'égard du marché en période d'inflation. Les emprunteurs et les prêteurs préfèrent tous deux les instruments à court terme.

## Prêts

Les prêts ont connu une hausse trimestrielle record de 8,943 millions, soit près du quadruple du montant des prêts émis au cours des trois premiers mois de 1980. Cet accroissement exceptionnel est surtout attribuable aux emprunts effectués par trois secteurs et s'est produit malgré le remboursement par le gouvernement canadien du solde en cours de \$300 millions É.U. sur sa ligne de crédit de confirmation. Cette dernière opération avait pour but d'améliorer les réserves internationales du Canada. Les principaux emprunteurs ont été les non-résidents (\$712 millions), les entreprises non financières de l'administration fédérale (\$1,495 millions, dont rend compte le financement des sommes versées aux fermiers par la Commission canadienne du blé) et les sociétés privées non financières. Ces dernières ont emprunté \$3,387 millions sous forme de prêts bancaires. L'augmentation des prêts consentis se répartit sur un grand nombre de secteurs bien que celui du pétrole et du charbon et les sociétés de petite taille dans les secteurs du commerce de détail et des services aient emprunté plus d'argent que d'autres. Le volume important des emprunts contractés par des non-résidents pendant le trimestre est peut-être dû au fait que le taux de base au Canada est resté inférieur à celui des banques américaines pendant la plus grande partie du trimestre.

Figure VI

## Chartered Bank Business Loans and Bankers Acceptances

## Prêts des banques à charte aux entreprises et acceptations bancaires

The very active bank borrowing appears surprising in view of the high cost of borrowing. However, there occurred a substantial shift in financing instrument during the first quarter, from longer term to shorter term borrowing (as indicated above) and among shorter term instruments. As a result, total credit extended has not increased significantly as a proportion of Gross National Product. Should interest rates drop, it is to be expected that there will be less use made of short-term financing, including bank loans.

In contrast to bank loans, "other loans" rose \$928 million during the quarter, little more than half the increase in the first three months of 1980. While trust companies were lending substantially more, Canadian subsidiaries of foreign banks (included in Sector VIII.7: "Other financial institutions: Other: Not elsewhere included") registered a much weaker quarter in their loan portfolios. In addition, the federal government forgave loans to the governments of the Yukon and Northwest Territories which was financed by a notional capital transfer, recorded in Category 1800 ("Net Purchases of Existing and Intangible Assets").

## Bonds

With high and rising inflation, coupled with record high yields on bonds, the bond market was placed under considerable strain. Yields on long-term Government of Canada bonds rose to an unprecedented 13.48% by the end of the quarter, with shorter dated issues and those with lower credit worthiness carrying even higher yields. That the total net new marketable issues amounted to \$5,501 million was largely attributable to the need to finance the federal government's deficit; the federal government's marketable bond liability rose by \$2,576 million. This increase represented almost 50% of all such issues in the quarter. In order to assist sales, 58% of the federal government's gross new issues carried extendible features, at the purchaser's option, while fully two-thirds had original terms to maturity of five years or less. Moreover, the Bank of Canada bought large amounts of longer dated bonds.

The federal government's need for cash was exacerbated during the first quarter by the large scale encashment of Canada Savings Bonds. In order to stem this flow, an increase in the interest rate was announced in March, raising the rate from 11.50% to 13.75% for the period to October 31, 1981. Even so, rates of interest payable on comparable instruments continued to appear more

La forte activité dans le secteur des prêts bancaires est assez surprenante vu le coût élevé des emprunts. Toutefois, il s'est produit un déplacement appréciable des emprunts à plus long terme vers les emprunts à plus court terme (comme il a déjà été mentionné) et également entre les instruments à plus court terme. Par conséquent, les prêts totaux émis représentent toujours à peu près la même proportion du produit national brut. Dans le cas d'une baisse de taux d'intérêt, on s'attend à ce que le financement à court terme, y compris les prêts bancaires, soit moins utilisé.

Contrairement aux prêts bancaires, les "autres emprunts" ont progressé de \$928 millions au cours du trimestre, ce qui représente un peu plus de la moitié de l'accroissement pour les trois premiers mois de 1980. Tandis que les sociétés de fiducie augmentaient leurs prêts de façon appréciable, les filiales canadiennes de banques étrangères (comprises dans le secteur VIII.7: "Autres institutions financières: Autres: non comprises ailleurs") ont connu un trimestre beaucoup moins fort sur le plan des prêts. En outre, l'administration fédérale a pardonné les prêts consentis aux administrations du Yukon et des Territoires du Nord Ouest au moyen d'un transfert de capital inscrit à la catégorie 1800 ("Achats nets d'actifs existants et intangibles").

## Obligations

Par suite d'une inflation élevée qui continue d'augmenter et de taux de rendement records sur les obligations, le marché des obligations a subi de fortes pressions. Les rendements sur les obligations à long terme du gouvernement canadien ont atteint le niveau record de 13.48 % à la fin du trimestre, alors que les émissions d'obligations à plus courte échéance, qui jouissent d'un crédit moins élevé, portaient des intérêts encore plus élevés. L'émission d'obligations négociables pour une valeur nette de \$5,501 millions visait à financer le déficit de l'administration fédérale, dont les engagements sous forme d'obligations négociables ont augmenté de \$2,576 millions. Cette hausse représentait plus de 50 % de toutes les obligations émises au cours du trimestre. En guise d'incitation à l'achat d'obligations, 58 % des émissions brutes de nouvelles obligations par l'administration fédérale comportaient des échéances reportables au gré de l'acheteur, tandis que les échéances de deux tiers d'entre elles étaient de cinq ans ou moins de cinq ans. De plus, la Banque du Canada a acheté un grand nombre d'obligations à plus long terme.

Les besoins en liquidités de l'administration fédérale ont été aggravés au premier trimestre par l'encaissement massif d'obligations d'épargne du Canada. Afin de contrebalancer ce mouvement, l'administration a annoncé en mars un relèvement du taux d'intérêt, qui est passé de 11.50 % à 13.75 % pour la période se terminant le 31 octobre 1981. En dépit de cette mesure, l'administration fédérale a dû déboursier \$1,789 millions au cours du

attractive, with the result that the federal government paid out \$1,789 million during the quarter. This continuing reduction in the level of Canada Savings Bonds outstanding meant that by the end of March 1981 these instruments accounted for only 17% of the federal government's liabilities, down from 24% just 15 months earlier. This policy was in line with the federal government's willingness to limit its exposure to this highly liquid liability.

Other aspects of the bond market in the first quarter included: the sale of foreign currency debentures by a chartered bank, permitted for the first time under the new Bank Act; the retirement of a Canadian National Railway bond, which had been guaranteed by the federal government at the time of issue, and which is recorded as a federal government bond (Category 3421); increased purchases by non-residents, reflecting the interest rate differential which favoured borrowing abroad by residents of Canada.

trimestre en raison du rendement supérieur qu'offraient les taux d'intérêt payés sur les instruments de même nature. Cette nouvelle réduction du nombre d'obligations d'épargne du Canada en cours a ramené à 17 % la part qu'elles occupaient dans les engagements de l'administration fédérale à la fin de mars, alors que cette proportion s'établissait à 24 % seulement 15 mois plus tôt. Cette évolution est conforme aux objectifs de l'administration fédérale, qui désire limiter sa dépendance envers les engagements à forte liquidité de ce type.

Le marché des obligations s'est également caractérisé par: la vente d'obligations libellées en monnaie étrangère par une banque à charte, opération que la nouvelle Loi sur les banques autorisait pour la première fois; le remboursement d'une obligation des Chemins de fer nationaux du Canada, qui avait été garantie par l'administration fédérale au moment de son émission et qui est enregistrée dans les obligations de l'administration fédérale (catégorie 3421); une augmentation des achats par les non-résidents, à cause du différentiel d'intérêt qui encourage les résidents canadiens à emprunter à l'étranger.

### Mortgages

Despite an improvement in the number of housing starts on a seasonally adjusted basis, the actual increase was very small, rising from 27,100 in the first quarter of 1980 to 28,400 in the first

### Hypothèques

Malgré une hausse du nombre désaisonnalisé de mises en chantier de logements, l'augmentation en nombre absolu est très faible, passant de 27,100 unités au premier trimestre de 1980 à 28,400 durant les trois premiers mois

three months of 1981. Coupled with exceptionally high mortgage rates, in the range of 15% to 15.75% throughout the quarter, mortgage activity declined sharply. Net new mortgages amounted to \$2,483 million, the lowest quarterly flow since 1975. Non-residential construction by non-financial private corporations was the only apparently bright aspect to the mortgage market, with this sector raising \$748 million, almost double the net flow in the same period in 1980.

Most of the funds were provided by mortgage loan companies (Sector VI.2.4) which increased their lending by \$1,468 million, compared with \$120 million in the first quarter of 1980. However, much of the change is attributable to switching in booking, with the chartered banks transferring substantial mortgage business to their mortgage subsidiaries. As a result, the banks' mortgage portfolio fell \$1,026 million.

de 1981. En raison de cette faible augmentation et de taux hypothécaires exceptionnellement élevés, qui ont oscillé entre 15 % et 15.75 % tout le long du trimestre, l'activité dans le secteur hypothécaire a fortement baissé. Les émissions nettes de nouvelles hypothèques se sont élevées à \$2,483 millions, soit le flux trimestriel le plus bas depuis 1975. Les travaux de construction non résidentielle entrepris par les sociétés privées non financières constituent la seule note positive sur le marché hypothécaire, atteignant \$748 millions, soit près du double du flux net observé au cours de la période correspondante de 1980.

La plupart des capitaux ont été souscrits par des sociétés de prêts hypothécaires (secteur VI.2.4), qui ont émis de nouveaux prêts pour une valeur de \$1,468 millions, contre \$120 millions au premier trimestre de 1980. Cependant, la plus grande part de cette variation est imputable à un déplacement de l'enregistrement, puisque les banques à charte ont transféré une partie appréciable de leurs affaires hypothécaires à leurs filiales spécialisées dans ce domaine. Par conséquent, les avoirs des banques en hypothèques ont diminué de \$1,026 millions.

## Stocks

Stock markets in Canada and the United States remained relatively firm. Losses in January and February were more than recouped in March. The Toronto Stock Exchange Composite 300 Index

## Actions

Les marchés boursiers canadiens et américains ont affiché une assez bonne tenue. Les pertes enregistrées en janvier et en février ont été plus que compensées par les gains en mars. L'indice composite de 300 valeurs in-

closed the quarter at 2,331.08, up from 2,268.70 at the end of 1980 and the Standard and Poor's Composite 500 Index reached 136.00.

dustrielles de la Bourse de Toronto a clôturé le trimestre à 2,333.08, contre 2,268.70 à la fin de 1980, et l'indice composite de Standard and Poor a atteint 136.00.

Figure X  
Stock Price Indices — Indices des cours en bourse

The strength of Canadian equities was surprising, in view of the high yields available on debt instruments. However, with bond holders continuing to see an erosion of their capital, investors may have been more confident that stocks would provide better protection during an inflationary period. Of the more heavily weighted industry groups, the index for paper and forest products rose 25%, while industrial products, transportation and merchandising all rose about 10%.

The brighter picture for equities encouraged corporations to place new issues in record amounts, with \$3,462 million in net new sales in the first quarter, an increase of almost 150% from the same period the year earlier. Non-financial private corporations were the most active, raising \$2,559 million, including a record equity financing with the creation of Dome Canada Ltd. The chartered banks were also very active, selling \$579 million in new stock issues, principally convertible preferred shares. Mutual funds experienced a very strong quarter with \$226 million in net sales. While trustee pension plans were active in acquiring stocks (\$809 million), non-residents continued to be disenchanted with Canadian equities, mak-

La fermeté des titres canadiens est surprenante étant donné les intérêts élevés servis sur les obligations. Toutefois, comme le capital des obligataires continue à s'éroder, il est possible que certains investisseurs croient que les actions offrent une meilleure protection en période inflationniste. Dans les groupes de secteurs à forte pondération, l'indice des produits de la forêt et du papier s'est accru de 25 %, tandis que les indices des produits industriels, des transports et du commerce augmentaient tous de 10 %.

Le climat plus favorable pour les actions a incité les sociétés à en émettre en quantité record, et les ventes nettes de nouvelles émissions se sont chiffrées à \$3,462 millions au premier trimestre, près de 150 % de plus qu'à la même période l'année précédente. Les sociétés privées non financières ont été les plus actives, se procurant \$2,559 millions en capitaux, notamment au moyen d'une émission d'actions record à la suite de la création de Dome Canada Ltd. Les banques à charte ont également connu une grande activité et ont émis de nouvelles actions pour une valeur de \$579 millions, principalement sous forme d'actions privilégiées convertibles. Les fonds mutuels ont connu un très bon trimestre et ont vendu des actions pour une valeur nette de \$226 millions. Alors que les régimes de pensions en fiducie se portaient acquéreurs

ing net sales of \$403 million. The National Energy Program and the lack of an oil pricing agreement between the federal government and the producing provinces may have been factors affecting this outflow.

### Consumer Credit

Consumer credit grew some \$1,228 million in the first quarter of 1981, a sharp increase from the rise of \$811 million in the first quarter of 1980. A major element in this change was the sharp rise in policy loans by life insurance companies. Policy holders appear to be taking advantage of clauses in their policies permitting borrowing against the cash surrender value at very low rates of interest.

d'un grand nombre d'actions (\$809 millions), les non-résidents continuaient à se désintéresser des valeurs canadiennes, en vendant pour une valeur nette de \$403 millions. Cette sortie de capitaux est peut-être attribuable au Programme énergétique national et à l'absence d'un accord entre l'administration fédérale et les provinces productrices au sujet de la fixation des prix du pétrole.

### Crédit à la consommation

Le crédit à la consommation a augmenté de quelque \$1,228 millions au premier trimestre de 1981, ce qui constitue une hausse importante par rapport à celle de \$811 millions observée au premier trimestre de 1980. Un élément important qui a contribué à cet accroissement a été la forte augmentation des prêts consentis par les sociétés d'assurance-vie sur les polices d'assurance. Les détenteurs de polices ont commencé à se prévaloir, semble-t-il, des dispositions de leurs polices qui leur permettent d'emprunter à taux très réduit l'équivalent de la valeur de rachat de celles-ci.

Figure XI

### Consumer Credit — Crédit à la consommation

## TECHNICAL NOTES

- (A) Commencing with the first quarter 1981, Canada Development Corporation is treated as a privately owned corporation and is included with "Other financial institutions: Other: not elsewhere included", Sub-sector VIII.7. Four subsidiaries of Canada Development Corporation – CDC Life Sciences, CDC Oil and Gas, Polysar and Petrosar – which in the past were included with "Non-financial government enterprises: federal", sub-sector IV.1 are, as of the first quarter 1981, included with "Non-financial private corporations", Sector III. These changes result from a decrease in the proportion of outstanding shares held by the government to less than 50%.
- (B) As of the first quarter 1981 the federal government wrote off approximately \$150 million in loans to the Northwest Territories and the Yukon Territories. These loans were originally made to finance certain types of capital expenditures. Payments of principal and interest on these loans had not been made since March 31, 1975. This loan forgiveness appears as a reduction in the loan asset of the federal government (Category 2332) with the capital transfer appearing as an increase in net purchases of existing and intangible assets (Category 1800). The corresponding entries in the provincial government sector are to the loan liability (Category 3332) and to Category 1800.

## NOTES TECHNIQUES

- A) À partir du premier trimestre de 1981, la Corporation de développement du Canada est traitée comme une entreprise privée et est incluse avec les "Autres institutions financières: autre: non compté ailleurs", sous-secteur VIII.7. Quatre filiales de la Corporation de développement du Canada "CDC Life Sciences Inc", "CDC oil and Gas Limited", "Polysar Limited" et "Petrosar Limited" qui faisaient partie du sous-secteur IV.1 "Entreprises publiques non-financières: fédérales" sont, à partir du premier trimestre de 1981, incluses au secteur III "sociétés privées non-financières". Ces changements résultent d'une diminution dans la proportion d'actions en circulation détenues par le gouvernement à un niveau inférieur à 50 %.
- B) À partir du premier trimestre de 1981, le gouvernement fédéral a inscrit en perte à peu près \$150 millions en prêts aux Territoires du Nord-Ouest et au Yukon. Ces prêts furent d'abord octroyés pour financer certains types de dépenses de capital. Les paiements en capital et en intérêt de ces prêts n'ont pas été faits depuis le 31 mars 1975. Ce prêt pardonné apparaît en diminution de l'actif des prêts du gouvernement fédéral (catégorie 2332) avec le transfert de capital apparaissant en augmentation dans le niveau des achats nets d'actifs existants et intangibles (catégorie 1800). Les entrées correspondantes dans le secteur des administrations publiques provinciales sont inscrites au passif de la catégorie des prêts (3332) et à la catégorie 1800.

## THE RELATIONSHIP BETWEEN THE NATIONAL INCOME AND EXPENDITURE ACCOUNTS (CAPITAL FINANCE ACCOUNTS) AND THE FINANCIAL FLOW ACCOUNTS

The capital finance accounts, as set out in the National Income and Expenditure Accounts (NIEA), record the saving and investment transactions of each sector of the economy. The net lending or borrowing of each sector, representing the surplus or deficit of the sector's saving over its requirements for non-financial capital acquisition, provides the basic link to the Financial Flow Accounts (FFA) which go beyond the NIEA by setting out the acquisition of financial assets and issuance of financial liabilities which underlie this net lending and borrowing. Text Table IV is a condensed version of what appears as the real accounts (categories 1100 to 1900) in the financial flows matrix (Tables 1-1 to 1-4, pp. 2-9).

**Sectoring.** The sector breakdown presented in the Financial Flow Accounts (41 sectors and subsectors) is more detailed than that presented in the NIEA (four sectors) but the two are fully reconcilable. Text Table IV shows the four NIEA sector names and, in roman numerals, the corresponding component FFA sectors and subsectors.

**Reconciliation of annual data.** The annual *National Income and Expenditure Accounts* (Catalogue 13-201), published in November, includes consolidated capital finance accounts in Table 10 (source) and Table 11 (disposition). These two tables summarize the Capital Finance Accounts which are in turn derived from the Income and Outlay Accounts of each of the four sectors as presented in Tables 12 through 27. The numbers appearing in parentheses beside the FFA category name in Text Table IV are the line numbers in which corresponding data appear in Table 10 (source) and Table 11 (disposition).

The Capital Finance Accounts of the NIEA do not include the FFA category Net Purchases of Existing and Intangible Assets as a separate item. It is the sum of the two FFA categories Net Lending or Borrowing (1900) plus Net Purchases of Existing and Intangible Assets (1800) which equals the surplus of sectoral saving over disposition as reported in the NIEA.

**Rest of the world or non-resident sector.** The item "Net inheritance and migrants funds", which is a component of the current account in the Canadian Balance of International Payments, is considered to be a capital transfer in the NIEA and FFA; as

## RELATION ENTRE LES COMPTES NATIONAUX DES REVENUS ET DES DÉPENSES (LES COMPTES DE FINANCEMENT DU CAPITAL) ET LES COMPTES DES FLUX FINANCIERS

Les comptes de financement du capital, tel que définis dans les comptes nationaux des revenus et dépenses (CNRD), enregistrent l'épargne et les transactions d'investissement pour chaque secteur de l'économie. Le niveau de prêt ou d'emprunt nets de chaque secteur, représentant le surplus ou déficit de l'épargne du secteur sur ses besoins d'acquisition de capital non-financier, fournit le lien de base aux comptes des flux financiers (CFF) qui vont au delà des CNRD en établissant l'acquisition des actifs financiers et la source des passifs financiers qui sont la base du niveau de prêt ou d'emprunt nets. Le tableau IV présente une version condensée de ce qui apparaît dans les comptes réels (catégories 1100 à 1900) de la matrice des flux financiers (tableaux 1-1 à 1-4, p. 2-9).

**Par secteur.** L'analyse sectorielle présentée dans les comptes de flux financier (41 secteurs et sous-secteurs) est plus détaillée que celle présentée dans les CNRD (4 secteurs) mais les deux sont entièrement réconciliables. Le tableau IV montre les 4 noms de secteur et, en chiffres romains, la composante correspondante des secteurs et sous-secteurs des CFF.

**Réconciliation de données annuelles.** La publication annuelle des *Comptes Nationaux des Revenus et des dépenses* (n° 13-201 au catalogue), publiée en novembre, inclut dans les tableaux 10 (source) et 11 (utilisation), les comptes de financement de capital dans leur ensemble. Les deux tableaux résument les comptes de financement de capital qui sont à leur tour dérivés des comptes de revenus et dépenses pour chacun des quatre secteurs tels que présentés dans les tableaux 12 à 27. Les nombres entre parenthèses à côté du nom de la catégorie des CFF du tableau IV, sont les nombres pour lesquels il existe des données correspondantes dans les tableaux 10 (source) et 11 (utilisation).

Les comptes de financement de capital des CNRD ne comprennent pas la catégorie "Achats Nets d'Actifs Existants et Intangibles" des CFF mais condense plutôt la somme de deux catégories des CFF Emprunt ou prêt net (1900) plus Achats Nets d'Actifs Existants et Intangibles (1800) qui correspond au surplus d'épargne par secteur sur l'utilisation telle que reportée dans les CNRD.

**Reste du monde ou secteur des non-résidents.** L'Item "Succession Nette et capitaux des migrants" qui est une composante du compte courant de la Balance Canadienne des Paiements Internationaux, est vu comme un transfert de capital dans les CFF et les CNRD; il est, par

VOIR NOTES A LA PAGE PRECEDENTE.

such, it is reported as Category 1800 of the Rest of the World Sector of the FFA. Category 1900, Net Lending or Borrowing, therefore equals the net deficit or surplus of Canada (net surplus or deficit of the Rest of the World) on current account as per the Canadian Balance of International Payments.

**Reconciliation of quarterly data.** The quarterly *National Income and Expenditure Accounts* (Catalogue 13-001) do not present a complete set of sector capital finance accounts. In particular, gross fixed capital formation is not broken down between the incorporated versus the unincorporated business sectors. In the FFA the quarterly split is estimated using the ratio of the latest annual data. The sectoral split for Capital Consumption Allowances and Miscellaneous Valuation Adjustments (CCA-1200) is based on unpublished data.

For the Persons and Unincorporated Business Sector, figures corresponding to Net Saving (1400) can be found as lines one plus two in Table 8 of the quarterly NIEA and the Value of Physical Change in Inventories (VPCI-1700) appears in Table 2, line 15. For the Corporate and Government Business Enterprise Sector, Net Saving (1400) equals the sum of lines three, four, five and six of Table 8. VPCI appears as line 14 of Table 2. For the Government Sector, Table 6 reports Net Saving (1400) on line 85 and CCA (1200) as line 92 while Gross Fixed Capital Formation (GFCF-1600) and VPCI are reported on lines four and 13 respectively of Table 2. Finally, the Rest of the World Sector is covered in Table 7: line 11 equals Net Saving (1400) with sign reversed and line 12 equals Net Purchases of Existing and Intangible Assets (1800).

conséquent, reporté à la catégorie 1800 du secteur du Reste du Monde des CFF. La catégorie 1900, Prêt ou emprunt nets, est, de ce fait, équivalente au déficit ou surplus net du Canada (Surplus ou déficit net du Reste du Monde) au compte courant de la Balance Canadienne des Paiements Internationaux.

**Réconciliation des données trimestrielles.** La publication trimestrielle, Comptes Nationaux des Revenus et des dépenses (n°. 13-001 au catalogue) ne présente pas un ensemble complet de secteur des comptes de financement de capital. En particulier, la formation brute de capital fixe n'est pas séparée entre les secteurs d'entreprises incorporées ou non incorporées. Dans les CFF cette distinction trimestrielle est estimée en utilisant un ratio basé sur les données annuelles les plus récentes. En ce qui concerne la catégorie 1200 (Provisions pour consommation de capital et ajustements divers) la séparation par secteur est basée sur des données non publiées.

Pour le secteur des particuliers et entreprises non constituées en sociétés, les données correspondant à l'épargne nette (1400) peuvent être trouvées à partir des lignes une plus deux dans le tableau 8 des CNRD (publication trimestrielle). De même la valeur de la variation matérielle des stocks (VVMS-1700) apparaît au tableau 2, ligne 15. Pour le secteur des corporations et entreprises commerciales publiques, l'épargne nette (1400) est égale à la somme des lignes trois, quatre, cinq et six du tableau 8. VVMS (1700) apparaît à la ligne 14 du tableau 2. Pour le secteur gouvernemental, le tableau 6 montre l'épargne nette (1400) à la ligne 85 et la PCC (1200) à la ligne 92 tandis que la Formation brute de Capital fixe (FBCF-1600) et la VVMS (1700) sont reportés respectivement aux lignes quatre et 13 du tableau 2. Finalement, le secteur du Reste du Monde est couvert au tableau 7 avec la ligne 11 équivalente à l'épargne nette (1400) avec signes opposés et la ligne 12 équivalente à l'Achat Net d'Actifs Existants et Intangibles (1800).

## NOTES ON DATA QUALITY IN THE FINANCIAL FLOW ACCOUNTS, WITH JUDGEMENTAL RATINGS OF OVERALL QUALITY, BY SECTOR

It is not possible to calculate estimates of the margin of error for the financial flows estimates similar to the sampling error or confidence intervals which can be calculated for estimates based on random samples. However, it is possible for someone familiar with the Financial Flow Accounts to rate the data quality, at least in a fairly rough and subjective way. Such estimates are a useful guide to the relative quality of different components of the Accounts, but they cannot be made precise. The following notes and letter grades (A or good, B or fair, C or poor) are therefore offered by way of an informed opinion of the relative overall quality of the data for each sector.

### Sector and Grade

#### I and II: Persons and Unincorporated Business – C

Most of the category data in this sector are calculated residually and consequently errors in any other sector of the Financial Flow Accounts will be reflected in Sectors I and II. There are two major categories in which data are of good quality: “life insurance and pensions” assets and the liability item “consumer credit”.

#### III: Non-Financial Private Corporations – B

Data are based on a quarterly survey in which all large companies (assets of \$10 million or more) report. The overall quality is significantly reduced because of the lack of an adequate sample and accurate response by small companies (assets less than \$10 million) which represent 30% of total assets. Since these smaller corporations rely on bank financing to a disproportionate extent, the quality of data on bank loans and some other categories is low.

#### IV.1: Non-Financial Government Enterprises: Federal – B

Data are based on unstructured balance sheets (level data) and therefore no flow adjustments can be made to account for valuation changes, etc. Allocation of balance sheet items to Financial Flow Accounts categories is sometimes done on a judgemental basis. Universe coverage is good.

#### IV.2: Non-Financial Government Enterprises: Provincial – B

Data are based on a variety of sources but universe coverage is fairly good. Some flow adjustments are made where data quality permit.

## REMARQUES SUR LA QUALITÉ DES DONNÉES DES COMPTES DE FLUX FINANCIERS, ET ÉVALUATION CRITIQUE DE LA QUALITÉ GLOBALE PAR SECTEUR

Il n'est pas possible de calculer des estimations de la marge d'erreur pour les estimations des flux financiers qui soient semblables à l'erreur d'échantillonnage ou aux intervalles de confiance que l'on peut calculer pour des estimations utilisant des échantillons aléatoires. Toutefois, une personne qui connaît quelque peu les comptes de flux financiers peut évaluer la qualité des données, au moins d'une façon approximative et subjective. De telles estimations constituent un guide utile pour la qualité relative des différentes composantes des comptes, mais il est impossible de les rendre précises. Les remarques qui suivent, ainsi que la classification littérale (A ou bon, B ou moyen, C ou faible) proviennent par conséquent d'une opinion informée de la qualité générale relative des données pour chaque secteur.

### Secteur et classification

#### I et II: Particuliers et entreprises non constituées en sociétés – C

La plupart des données pour ce secteur sont calculées de façon résiduelle et par conséquent des erreurs entachant tout autre secteur des comptes de flux financiers se retrouveront dans les secteurs I et II. Il y a deux catégories principales dont les données sont de bonne qualité: l'actif “assurances-vie et rentes” et le poste de passif “crédit à la consommation”.

#### III: Entreprises publiques non financières – B

Les données sont établies à partir d'une enquête trimestrielle à laquelle répondent toutes les grandes compagnies (actif d'au moins \$10 millions). La qualité générale se trouve sensiblement réduite en raison de l'inexistence d'un échantillon approprié et d'une réponse précise de la part des compagnies plus petites (actif inférieur à \$10 millions), qui comptent pour 30 % de l'actif total. Comme ces sociétés moins importantes utilisent le financement bancaire de façon disproportionnée, la qualité des données sur les prêts bancaires et sur quelques autres catégories est faible.

#### IV.1: Entreprises publiques non financières: fédérales – B

Les données sont établies à partir de bilans non structurés (données de stocks), et il est par conséquent impossible d'apporter des corrections de flux pour tenir compte des changements d'évaluation, etc. L'affectation des postes du bilan aux catégories de comptes de flux financiers se fait parfois au jugé. Le champ d'observation de l'univers est bon.

#### IV.2: Entreprises publiques non financières: provinciales – B

Les données sont établies à partir de diverses sources, mais le champ d'observation de l'univers est assez bon. Certaines corrections de flux sont apportées lorsque la qualité des données l'autorise.

### **IV.3: Non-Financial Government Enterprises: Local – C**

Coverage, timing and quality of reported data are all relatively poor, as there is no structured sample survey of this sector. Some components of the universe, such as telephone, gas and electric utility local government enterprises, are well covered by annual surveys but these data are only available after a lag of several years.

#### **V: Monetary Authorities – A**

The quality of data recorded by the Bank of Canada, the Exchange Fund Account and the other monetary authorities is good in terms of both coverage and timeliness of reporting.

#### **VI.1: Chartered Banks – A**

The major problem with this sub-sector, for which the data are otherwise very good, is that data are not reported on a booked-in-Canada basis (i.e., domestic operations only). Some estimates are made in order to put the data on this basis. Full universe coverage is ensured by the regulatory authorities (Inspector General of Banks, Bank of Canada) from whom the data are obtained.

#### **VI.2.1, 2.3, 2.4: Near-Banks – A**

The quality and coverage of all three sub-sectors are good. Trust Companies (VI.2.3) and Mortgage Loan Companies (VI.2.4) submit data on structured questionnaires in response to a quarterly survey with very high coverage. The sole Quebec Savings Bank (VI.2.1) submits balance sheet data to the regulatory authorities.

#### **VI.2.2: Credit Unions and Caisses Populaires – B**

Credit Unions and *Caisses Populaires* (VI.2.2) submit data to their provincial centrals which in turn submit data to Statistics Canada. While coverage and quality are good, overall, data are often late by one or more quarters for several provinces. This necessitates estimation for the current quarter but figures are later revised. Therefore, current quarter estimates should be rated B (fair) whereas, after revision, the data are A (good).

#### **VII.1: Life Business of Life Insurance Companies and Fraternal Benefit Societies – A**

#### **VII.2: Segregated Funds of Life Insurance Companies – A**

Data are submitted in response to a quarterly survey on a structured questionnaire which parallels the reporting requirements of the regulatory authorities (Superintendent of Insurance). Coverage, quality and timeliness are good.

### **IV.3: Entreprises publiques non financières: locales – C**

Le champ d'observation, le délai et la qualité des données déclarées sont tous relativement médiocres, car il n'y a pas d'enquête par échantillonnage structurée pour ce secteur. Certains éléments de l'univers, comme les entreprises de téléphone, de gaz et d'électricité des administrations locales, sont bien étudiées lors d'enquêtes annuelles, mais ces données ne sont disponibles qu'après plusieurs années.

#### **V: Autorités monétaires – A**

La qualité des données rapportées par la Banque du Canada, le Fonds des changes et les autres autorités monétaires est bonne en termes à la fois des champs d'observation et des délais de déclaration.

#### **VI.1: Banques à charte – A**

Le principal problème de ce sous-secteur, dont par ailleurs des données sont très bonnes, est que les données ne sont pas déclarées sur une base de comptabilisation au Canada (c.-à-d. les opérations intérieures seulement). On fait quelques estimations afin d'aligner des données sur cette base. L'exhaustivité du champ d'observation est garantie par les organismes de réglementation (Inspecteur général des banques, Banque du Canada), qui communiquent les données.

#### **VI.2.1, 2.3, 2.4: Quasi-banques – A**

La qualité et le champ d'observation des trois sous-secteurs sont bons. Les sociétés de fiducie (VI.2.3) et les sociétés de prêts hypothécaires (VI.2.4) présentent des données sur des questionnaires structurés en réponse à une enquête trimestrielle ayant un champ d'observation très poussé. La seule banque d'épargne de Québec (VI.2.1) présente des données de bilan aux organismes de réglementation.

#### **VI.2.2: Caisses populaires et caisses d'épargne et de crédit – B**

Les caisses d'épargne et de crédit et les caisses populaires (VI.2.2) soumettent les données à leurs centrales provinciales qui, à leur tour, fournissent les données à Statistique Canada. Bien que le champ d'observation et la qualité soient bons, dans l'ensemble, les données sont souvent en retard d'un ou plusieurs trimestres dans le cas de plusieurs provinces. Il faut donc procéder à des estimations pour le trimestre en cours, mais les chiffres sont ensuite révisés. Par conséquent, les estimations du trimestre courant doivent être classées B (moyennes) tandis que, après révision, les données sont A (bonnes).

#### **VII.1: Opérations en assurance-vie des sociétés d'assurance-vie et de secours mutuels – A**

#### **VII.2: Caisses séparées des sociétés d'assurance-vie – A**

Les données sont recueillies lors d'une enquête trimestrielle utilisant un questionnaire structuré qui suit les exigences de déclaration des organismes de réglementation (Surintendant des assurances). Le champ d'observation, la qualité et les délais sont bons.

### **VII.3: Trusteed Pension Funds — A**

A large sample of funds submit quarterly data on a structured questionnaire. Full universe coverage is obtained annually, at which time revisions are made to the formerly estimated fraction of the universe.

### **VIII.1-6: Other Private Financial Institutions — A**

In all sub-sectors, respondents submit data on structured questionnaires. Coverage, quality and timeliness are good.

### **VIII.7: Other Private Financial Institutions: Other, n.e.i. — B**

This sub-sector includes holding companies, closed end funds, venture capital companies, finance leasing companies and other business finance (including subsidiaries of foreign banks). Universe coverage is not very good for holding companies. However, respondents do submit data on structured forms.

### **IX: Public Financial Institutions — B**

Coverage of this group of institutions, although fairly high, relies on unstructured returns from which financial flow categories must be derived. In the case of many of the smaller institutions in IX.2 (Provincial) only annual data are available. The total universe is relatively small. For federal government enterprises only level data are available and therefore no flow adjustments can be made for valuation changes, etc.

### **X: Federal Government — B**

Coverage and timeliness are good. Data are only available in level terms and therefore flow adjustments for valuation changes, etc., are not always possible. The government does not submit data on structured forms and there are sometimes difficulties in allocating balance sheet items to the appropriate Financial Flow Accounts category. Certain major data categories such as treasury bills and Government of Canada bonds present data of high quality.

### **XI.1: Provincial Governments — B**

Coverage is good with timeliness somewhat less satisfactory than for the Federal Government. The level of detail available is less than sufficient to enable ready translation to Financial Flows Accounts categories. This results from lack of structured questionnaires and the difficulty of estimating flows on an accrual rather than cash basis.

### **VII.3: Régimes de pensions en fiducie — A**

Un important échantillon de régimes présente des données trimestrielles sur un questionnaire structuré. Il y a observation exhaustive de l'univers chaque année, mais à ce moment-là, on apporte des révisions à la fraction préalable-ment estimée de l'univers.

### **VIII.1-6: Autres institutions financières privées — A**

Pour tous les sous-secteurs, les répondants déclarent les données sur des questionnaires structurés. Le champ d'observation, la qualité et les délais sont bons.

### **VIII.7: Autres institutions financières privées n.c.a. — B**

Ce sous-secteur regroupe les sociétés de portefeuille, les sociétés d'investissement à capital fixe, les sociétés à capital de risque, les compagnies de financement de crédit-bail et les autres entreprises financières commerciales (y compris les filiales des banques étrangères). Le champ d'observation n'est pas très bon dans le cas des sociétés de portefeuille. Toutefois, les répondants soumettent les données sur des formules structurées.

### **IX: Institutions financières publiques — B**

Le champ d'observation de ce groupe d'institutions, même s'il est assez poussé, utilise des déclarations non structurées à partir desquelles il faut calculer les catégories de flux financiers. Dans le cas d'un grand nombre d'institutions plus petites du sous-secteur IX.2, on ne dispose que de données annuelles. L'univers total est relativement petit. Dans le cas des entreprises fédérales, on ne dispose que de données de stocks, et par conséquent, il est impossible d'apporter des corrections de flux dans le cas des changements d'évaluation, etc.

### **X: Administration publique fédérale — B**

Le champ d'observation et les délais sont bons. On ne dispose que de données de stocks, et par conséquent il n'est pas toujours possible d'apporter des corrections de flux pour les changements d'évaluation. L'administration ne présente pas les données sur des formules structurées, et il y a parfois des problèmes lorsqu'il s'agit d'affecter des postes de bilan à la catégorie des comptes de flux financiers appropriée. Certaines catégories importantes de données, comme les bons du Trésor et les obligations du gouvernement du Canada, fournissent des données de haute qualité.

### **XI.1: Administrations publiques provinciales — B**

Le champ d'observation est bon et les délais sont un peu moins satisfaisants que dans le cas de l'administration fédérale. Le niveau de détail existant est moins que suffisant pour permettre une conversion rapide en termes des catégories des comptes de flux financiers. Cette situation s'explique par l'absence de questionnaires structurés et la difficulté d'estimer des flux sur une base de comptabilité d'exercice plutôt que de caisse.

## **XI.2: Local Governments – C**

Data are based on a number of separate surveys and coverage is incomplete; currently available data are insufficiently detailed and there are difficulties in estimating data on an accrual basis. Acquisition of accurate data is complicated by the fact that much municipal financing is carried out under several different funds which must be integrated, e.g. general revenue funds, general capital and loan funds, sinking funds, reserve funds.

## **XI.3: Hospitals – C**

Respondents file structured questionnaires and coverage is good but there is a serious problem of lack of timeliness. Data are often estimated, at least in part, for several years until actual data for the reference period become available.

## **XII: Social Security Funds – A**

Data are based on transactions of the Canada Pension Plan and the Quebec Pension Plan only. Quarterly estimates are available and are related principally to two financial flow categories.

## **XIII: Rest of the World – B**

Data presented in the Financial Flow Accounts are essentially a restatement of Balance of Payments data which in turn are based on a variety of sources. Some data are based on direct surveys, which in many cases offer less than complete coverage. Other data are based on information gathered for other than Balance of Payments purposes. Some categories (e.g., official reserves transactions) present data of very high quality. In other categories (e.g., trade credit, mortgages) data are either lacking or coverage is very incomplete.

## **XI.2: Administrations publiques locales – C**

Les données utilisent un certain nombre d'enquêtes distinctes et le champ d'observation est incomplet. Les données actuellement disponibles ont un niveau de détail insuffisant, et il y a des difficultés d'estimation des données sur une base de comptabilité d'exercice. L'acquisition de données précises se trouve compliquée par le fait qu'une grande partie du financement des municipalités s'effectue par l'entremise de plusieurs fonds différents qui doivent être intégrés, comme par exemple les fonds de recettes générales, les fonds de capital général et de prêts, les fonds d'amortissement, les fonds de réserve.

## **XI.3: Hôpitaux – C**

Les répondants utilisent des questionnaires structurés et le champ d'observation est bon, mais il y a un problème sérieux de délai. Les données sont souvent estimées, au moins en partie, pendant plusieurs années jusqu'à ce que les données réelles pour la période de référence parviennent enfin.

## **XII: Caisses de sécurité sociale – A**

Les données sont établies à partir des opérations du Régime de pensions du Canada et du Régime de rentes du Québec. Il existe des estimations trimestrielles, qui se rapportent principalement à deux catégories des flux financiers.

## **XIII: Reste du monde – B**

Les données figurant dans les comptes de flux financiers sont essentiellement une reprise des données de la balance des paiements, lesquelles utilisent une foule de sources. Certaines données proviennent d'enquêtes directes, qui souvent offrent un champ d'observation incomplet. D'autres données sont établies à partir de renseignements recueillis pour des fins autres que la balance des paiements. Certaines catégories (par exemple, les opérations sur réserves officielles) offrent des données de très haute qualité. Pour d'autres catégories (ex.: crédit commercial, hypothèques), les données sont soit inexistantes ou ont un champ d'observation très incomplet.

## OTHER PUBLICATIONS

### **Annual Flows and Year-end Financial Assets and Liabilities, 1961-1979, Catalogue 13-563**

Included in this publication are annual matrices for financial flows and year-end outstandings as well as time series for both year-end outstandings and annual flows for all sectors and subsectors.

### **Financial Flow Accounts: Volume 1, Quarterly Flow Estimates, 1962-1975, Catalogue 13-562**

This publication includes annual matrices, quarterly time series for all sectors and subsectors, time series for all of the major categories, as well as time series for the summary credit market activity table.

## **Occasional Articles**

Articles which have appeared in the Financial Flow Accounts publication on an occasional basis are available on request, from the Financial Flows Section.

## **Article Previously Published**

Registered Retirement Savings Plans in the Financial Flow Accounts, third quarter 1975.

Seasonality in the Financial Flow Accounts, fourth quarter 1975.

Measuring Financial Market Activity: A Macroeconomic Perspective, second quarter, 1976.

A Newcomer to Canadian Financial Markets: The Floating Rate Retractable Preferred Share, third quarter 1977.

The Treatment of Government Takeovers of Private Corporations in the Financial Flow and Balance Sheet Accounts, fourth quarter 1977.

Official Foreign Currency Financing; Standby Credit Facilities: Financial Flows Treatment, first quarter 1978.

The New Presentation of the Net Errors and Omission Item of the Balance of Payments in the Financial Flow Accounts, first quarter 1978.

A comparison of the Bank of Canada and Financial Flow Accounts: Time Series of Net New Issues of Stocks in the Financial Flow Accounts, third quarter 1978.

## AUTRES PUBLICATIONS

### **Flux annuels et encours de l'actif et du passif financiers à la fin de l'année, 1961-1979, n° 13-563 au catalogue**

Cette publication inclut les matrices annuelles des flux financiers et des encours en fin d'année de même que les séries chronologiques des encours en fin d'année et des flux annuels pour tous les secteurs et leurs sous-secteurs.

### **Comptes des flux financiers: volume 1, estimation des flux trimestriels, 1962-1975, n° 13-562 au catalogue**

Cette publication comprend les matrices annuelles, les séries chronologiques trimestrielles pour tous les secteurs et tous les sous-secteurs, les séries chronologiques pour les grandes catégories et les séries chronologiques du tableau sommaire de l'activité du marché du crédit.

## **Articles hors série**

Les articles qui ont paru à l'occasion dans la publication des Comptes des flux financiers sont disponibles sur demande, auprès de la Section des flux financiers.

## **Articles déjà publiés**

Les régimes enregistrés d'épargne retraite dans les comptes de flux financiers, troisième trimestre 1975.

La saisonnalité dans les comptes des flux financiers, quatrième trimestre 1975.

La mesure de l'activité du marché financier: Une étude macroéconomique, deuxième trimestre 1976.

Un nouveau venu sur les marchés financiers canadiens: L'action privilégiée exigible à rendement variable, troisième trimestre 1977.

La comptabilisation des nationalisations d'entreprises privées dans les comptes des flux financiers et de bilan, quatrième trimestre 1977.

Financement officiel en devises et facilités de crédit de confirmation: comptabilisation dans les flux financiers, premier trimestre 1978.

Nouvelle présentation du poste "Erreurs et omissions nettes" de la balance des paiements dans les comptes des flux financiers, premier trimestre 1978.

Comparaison des séries chronologiques de la Banque du Canada et des comptes des flux financiers sur les émissions nettes d'actions dans les comptes des flux financiers, troisième trimestre 1978.

Life insurance Data: A Restructuring with Improved Coverage and Category Detail, third quarter 1979.

A Comparison of the Foreign Currency Position of Chartered Banks as Presented in the Financial Flow Accounts, the Balance of Payments and the Bank of Canada Review, first quarter 1980.

## Note

This and other government publications may be purchased from local authorized agents and other community bookstores or by mail order.

Mail orders should be sent to Publications Sales and Services, Statistics Canada, Ottawa, K1A 0V7, or to Publishing Center, Supply and Services Canada, Ottawa, K1A 0S9.

Inquiries about this publication should be addressed to:

Financial Flows Section,  
Financial Flows and Multinational Enterprises  
Division,

Statistics Canada, Ottawa, K1A 0T6 (telephone: 995-0851) or to a local Advisory Services office:

|                   |            |
|-------------------|------------|
| St. John's(Nfld.) | (737-4073) |
| Halifax           | (426-5331) |
| Montréal          | (283-5725) |
| Ottawa            | (992-4734) |
| Toronto           | (966-6586) |
| Winnipeg          | (949-4020) |
| Regina            | (359-5405) |
| Edmonton          | (420-3027) |
| Vancouver         | (666-3695) |

Toll-free access to the regional statistical information service is provided in Nova Scotia, New Brunswick, and Prince Edward Island by telephoning 1-800-565-7192. Throughout Saskatchewan, the Regina office can be reached by dialing 1(112)800-667-3524, and throughout Alberta, the Edmonton office can be reached by dialing 1-800-222-6400.

## Note

On peut se procurer cette publication, ainsi que toutes les publications du gouvernement du Canada, auprès des agents autorisés locaux, dans les librairies ordinaires ou par la poste.

Les commandes par la poste devront parvenir à Ventes et services de publications, Statistique Canada, Ottawa K1A 0V7, ou à Imprimerie et édition, Approvisionnement et Services Canada, Ottawa, K1A 0S9.

Toutes demandes de renseignements sur la présente publication doivent être adressées à:

Section des flux financiers,  
Division des flux financiers et des entreprises multinationales,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 995-0851) ou à un bureau local des Services consultatifs situé aux endroits suivants:

|                   |            |
|-------------------|------------|
| St. John's(T.-N.) | (737-4073) |
| Halifax           | (426-5331) |
| Montréal          | (283-5725) |
| Ottawa            | (992-4734) |
| Toronto           | (966-6586) |
| Winnipeg          | (949-4020) |
| Regina            | (359-5405) |
| Edmonton          | (420-3027) |
| Vancouver         | (666-3695) |

On peut obtenir une communication gratuite avec le service régional d'information statistique de la Nouvelle-Écosse, du Nouveau-Brunswick et de l'Île-du-Prince-Édouard en composant 1-800-565-7192. En Saskatchewan, on peut communiquer avec le bureau régional de Régina en composant 1(112)800-667-3524, et en Alberta, avec le bureau d'Edmonton au numéro 1-800-222-6400.

## Symbols

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
  - nil or zero.
- - amount too small to be expressed.
- <sup>p</sup> preliminary figures.
- <sup>r</sup> revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

## NOTE ON CANSIM

Complete historical quarterly series for the financial flows are available on CANSIM and cover the period from the first quarter of 1962 to the present. Data for the current quarter are placed on CANSIM at approximately the same time as the Second Advance Release of the Financial Flow Accounts and approximately one month prior to the main quarterly publication. Advance Releases for the Financial Flow Accounts are available upon request free of charge and do not automatically accompany a subscription to the main publication.

## Obtaining Consistent Time Series

Consistent time series cannot be obtained by piecing data together from successive issues of the Financial Flow Accounts. The volume of data that form the raw ingredients of the accounts and the frequency of revisions in these data make it difficult to maintain time series that are both consistent and up-to-date in printed form available to the public. For certain types of research it is not necessary to have the latest quarter's or year's data and use can be made of historical publications such as Catalogue 13-563 which contains annual flows and year-end stocks. For other types of work, or certain types of current analysis, the length of the series is not critical and the current quarterly publication and advance releases can be used. If the requirement is for data which contains the latest revisions and which covers a more lengthy period than the current publication it is advisable to use CANSIM.

The financial market summary table is now available on CANSIM in table format. For further information contact CANSIM (telephone: 995-7406) or G. Gravel (telephone: 995-0851).

## Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
  - néant ou zéro.
- - nombres infimes.
- <sup>p</sup> nombres provisoires.
- <sup>r</sup> nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

## NOTE CONCERNANT CANSIM

Les séries chronologiques et trimestrielles complètes des flux financiers sont disponibles à partir de CANSIM pour la période s'étendant du premier trimestre 1962 jusqu'à aujourd'hui. Les données du trimestre en cours sont mises sur CANSIM en même temps, approximativement, que le *Communiqué anticipé* n°2, soit environ un mois avant la principale livraison trimestrielle. Les Communiqués anticipés des Comptes des flux financiers sont disponibles sur demande, sans frais; les abonnés à la publication principale doivent en faire la demande expresse, s'ils désirent la recevoir.

## Obtention des séries chronologiques cohérentes

On ne peut pas obtenir des séries chronologiques cohérentes en réunissant simplement les données de publications successives des Comptes des flux financiers. Du fait du volume des données brutes qui entrent dans la composition des comptes et de la fréquence des révisions à effectuer sur ces données, il est difficile d'avoir des séries chronologiques qui soient à la fois cohérentes et à jour dans leur version imprimée destinée au grand public. Certes, certaines recherches n'obligent pas à avoir les chiffres du dernier trimestre ou de la dernière année, et il est alors possible de se référer aux publications à caractère plus historique, comme le n° 13-563 au catalogue qui présente les flux annuels et les encours de fin d'année. Par contre, pour certains travaux et certaines formes d'analyses de conjoncture, la longueur de la série n'est pas essentielle, et on peut se servir de la publication trimestrielle courante et des communiqués préliminaires. Dans les cas où les données doivent avoir été soumises aux réunions les plus récentes et couvrir une période plus longue que celle visée par les publications courantes, il est conseillé d'avoir recours à CANSIM.

Le tableau sommaire du marché financier est maintenant disponible sur CANSIM. Toutes demandes de renseignements doivent être adressées à CANSIM (téléphone: 995-7460) ou à G. Gravel (téléphone: 995-0851).

## FINANCIAL ACTIVITY IN CANADA

### An Overview

During the second quarter of 1981, domestic non-financial sectors of the Canadian economy raised \$22,571 million on conventional credit markets, (securities plus consumer credit and loans) compared with \$17,375 million in the same period of 1980. This represented 28.5% of the value of final goods and services produced in the period, up from 24.7% in the second quarter of 1980.

Figure 1

**Total Funds Raised on Conventional Credit Markets by Domestic Non-financial Sectors as a Percentage of Gross National Product**

**Total des fonds engendrés sur les marchés de crédit conventionnels par le secteur interne non-financier en pourcentage du produit national brut**

Non-financial private corporations raised almost half these funds, compared with about one third in the second quarter the year before. The proportion raised by general government (Sectors X and XI) fell from 19% to 8%. The major supplier of funds to conventional credit markets remained the chartered banks, which accounted for almost half of the funds raised by all sectors on conventional credit markets, up ten percentage points from the equivalent period in 1980. Other private domestic financial institutions supplied a quarter of these moneys, down from almost one third in the second quarter the year earlier. (See Text Table I).

The use of bank loans continued to dominate the various financing instruments used by the non-financial domestic sectors of the Canadian economy on these conventional credit markets, rising to 45% from 35% in the period twelve months earlier. On the other hand, the use of bonds and stocks weakened, falling to 4% and 7%, respectively, from 17% and 13%.

Major factors affecting financial activity in the second quarter of 1980 included: a number of very large takeovers, particularly in the petroleum industry, which were principally financed by bank loans; rapidly rising interest rates to record levels, coupled with a fall in M1; a strong increase in Gross National

## ACTIVITÉ FINANCIÈRE AU CANADA

### Vue d'ensemble

Au cours du deuxième trimestre de 1981, les secteurs non-financiers de l'économie canadienne ont engendré \$22,571 millions sur les marchés de crédit ordinaires, comparativement à \$17,375 millions à la même période en 1980. Ces capitaux représentent 28.5% de la valeur finale des biens et services produits au cours de la période, soit une augmentation de 24.7% par rapport au deuxième trimestre de 1980.

Les entreprises privées non-financières ont contribué pour près de la moitié de ces fonds ainsi engendrés, comparativement à un tiers au second trimestre de l'année précédente. La proportion des fonds engendrés par les administrations publiques (secteurs X et XI) est tombée de 19% à 8%. Le principal fournisseur de fonds, sur les marchés de crédit ordinaires, reste les banques à charte qui ont contribué pour près de la moitié des fonds engendrés par tous les secteurs sur ces marchés, soit une hausse de 10% par rapport à la période équivalente en 1980. Les autres institutions financières privées canadiennes ont fourni un quart de ces avoirs, soit une baisse de près d'un tiers par rapport au deuxième trimestre de l'année précédente (voir tableau explicatif I).

L'utilisation de prêts bancaires a continué de dominer les différents instruments financiers utilisés par les secteurs domestiques non-financiers de l'économie canadienne sur les marchés de crédit ordinaires, passant de 35% à 45% par rapport à l'année dernière. Par contre l'utilisation d'obligations et d'actions a diminué passant, respectivement de 17% et 13% à 4% et 7%.

Les principaux facteurs qui ont marqué l'activité financière au second trimestre de 1981 ont été: un certain nombre d'importantes prises de contrôle (particulièrement dans l'industrie pétrolière) qui furent financées principalement par des prêts bancaires; une hausse rapide et vers des niveaux records des taux d'intérêts, jumelée à une baisse de M1; un

The Financial Market Summary Table compresses the abundance of detail presented in the Financial Flows sector tables by aggregating sectors and by deleting non-market instruments such as trade credit and claims on associated enterprises. The Table also provides a useful approximation to final borrowing via financial markets (i.e. the organized markets for security issues and negotiated loans) and avoids double counting of the intermediary borrowing and re-lending of financial institutions. Line 5 (Total Borrowing by Domestic Non-financial Sectors) provides the unduplicated total which serves as a simple summary statistic of domestic credit market activity. The addition of the Rest of the World and Financial Institutions (lines 6 and 8) completes the system and consequently line 9 (Total Funds Raised = Total Funds Supplied) reflects the basic identity that the change in liabilities, summed across sectors, for an instrument or instruments equals the change in assets, summed across sectors, for the same instrument or instruments. Further discussion of the Table is contained in an article published in Financial Flow Accounts, Second Quarter 1976 and in the Canadian Statistical Review, March 1977.

(1) Since Sector XII, Social Security Funds, has been consolidated with General Government, the holdings by the Funds of Provincial and Federal Government bond debt are netted out: the asset bond figure (category 2420) for Sector XII is subtracted from the sum of the liability bond figure for Sectors X (Federal Government) plus XI (Provincial and Local Governments and Hospitals).

(2) Separate figures for the share liabilities of the Rest of the World (Sector XIII) are not available but since Foreign Investments (category 3530) consists mostly of shares, it is included with Stocks, (category 3520).

(3) The Stock figure included in Sector I and II is the true residual of category 3520, i.e. it is the sum of category 3520 (the stock liability) less the sum of category 2520 (the stock asset) for sectors III through XIII. This procedure is necessary to ensure the balance between total funds supplied and raised in line 9. In the main Financial Flows Matrix the sum across sectors of corporate claims plus stocks on the liability side equals the sum of the two on the asset side; however, stocks alone do not balance because stocks on the liability side include shares issued to associated enterprises (included in corporate claims on the asset side).

Le Tableau sommaire du marché financier comprime les renseignements détaillés figurant dans les tableaux sectoriels des comptes de flux financiers par l'aggrégation des secteurs et la suppression des instruments hors marché tels que les effets commerciaux et les engagements sur entreprises associées. Le tableau permet également d'avoir une approximation utile des emprunts finals sur les marchés financiers (c'est-à-dire les marchés organisés pour les émissions de valeurs et les prêts négociés) tout en évitant le double compte des emprunts intermédiaires et les seconds prêts des institutions financières. La ligne 5, Total des emprunts des résidents canadiens à l'exclusion des institutions financières, donne un total sans double compte qui est une statistique récapitulative simple de l'activité sur le marché intérieur du crédit. Le Reste du monde et les Institutions financières (lignes 6 et 8) viennent compléter le système, et la ligne 9 (Total des fonds empruntés = total des fonds offerts) rend compte de l'identité fondamentale selon laquelle la variation des éléments de passif, après sommation par secteur, pour un ou des instruments, est égale à la variation des éléments d'actif, après sommation par secteur, pour le ou les mêmes instruments. Le tableau explicatif fait l'objet d'un article paru dans le numéro du deuxième trimestre de 1976 de Comptes des flux financiers et celui de mars 1977 de la Revue statistique du Canada.

1) Comme le secteur XII, Caisses de sécurité sociale, a été consolidé avec l'Administration publique générale, les avoirs d'émissions obligataires des administrations fédérale et provinciales de ce secteur sont calculés par déduction: on déduit le chiffre des obligations (catégorie 2420) pour le secteur XII de la somme des chiffres correspondants au passif des secteurs X (Administration publique fédérale) plus XI (Administrations publiques provinciales et locales et hôpitaux).

2) On ne dispose pas de chiffres distincts sur le passif sous forme de parts du secteur XIII (Reste du monde), mais comme ces derniers représentent la plus grande partie des investissements étrangers (catégorie 3530), cet élément est compris dans les actions (catégorie 3520).

3) Le chiffre pour les actions figurant au secteur I et II est le résidu vrai de la catégorie 3520, c'est-à-dire qu'il est la somme de la catégorie 3520 (Passif-actions) moins la somme de la catégorie 2520 (Actif-actions) des secteurs III à XIII. Cette opération est nécessaire pour garantir l'équilibre entre le total des fonds empruntés et le total des fonds offerts (ligne 9). Dans la matrice des flux financiers, la somme des engagements des entreprises constituées par secteur plus les actions du côté du passif est égale à la somme des deux du côté de l'actif. Toutefois, les totaux pour les actions proprement dites ne correspondent pas car les actions du côté du passif comprennent les parts émises aux entreprises associées (qui sont comprises dans les créances des entreprises constituées du côté de l'actif).

Product; continuing strength in gross fixed capital formation by non-financial private corporations, which, because of somewhat reduced sector saving, required a substantial increase in net borrowing; an increase in the number of housing starts; a substantial gain in expenditure on consumer durables, producing the strongest quarter for consumer credit in two years; a record deficit on Canada's current account of the balance of international payments; and a drop in Government of Canada's net financing requirement.

accroissement marqué du Produit National Brut; une vigueur continue de la formation brute de capital fixe des sociétés privées non-financières, qui, avec un relâchement de l'épargne, ont dû accroître de façon substantielle leurs besoins de financement; un accroissement du nombre de constructions domiciliaires; un accroissement marqué des dépenses en biens durables produisant la plus forte hausse du crédit à la consommation au cours des deux dernières années; un déficit record au compte courant de la balance canadienne des paiements internationaux; une baisse des besoins en financement du Gouvernement du Canada.

## Economic Activity

The Canadian economy showed remarkable resilience in the second quarter, in the face of the continuing policy of monetary restrictiveness and rapidly rising interest rates. Canada's Gross National Product rose 14.0% in nominal terms, while, in volume, the increase amounted to 4.7%, over the second quarter of 1980. However, the indications were that most of the increase occurred in the earlier part of the quarter and that the very high interest rates were beginning to have an effect by the end of the period.

The economy's performance was fuelled by the very high level of gross fixed capital formation of non-financial private corporations. Much of the increase was concentrated in the metal mines, petroleum, paper, transportation related, communications, chemical and pipeline industries. The strength of gross fixed capital formation occurred at a time of weakening savings by non-financial private corporations with the result that internal sources of funds accounted for 63% of the sector's non-financial capital accumulation, down from 79% in the same period of 1980.

## Activité économique

L'économie canadienne a subi un remarquable rebondissement au deuxième trimestre, en dépit des politiques monétaires restrictives et des hausses rapides des taux d'intérêt. Le Produit National Brut canadien a grimpé de 13.8% en valeur nominale, tandis qu'en volume cet accroissement se chiffre à 4.7% par rapport au deuxième trimestre de 1980. Cependant, certaines indications nous montrent que la majeure partie de cet accroissement s'est produite en début de trimestre et que le niveau très élevé des taux d'intérêt ont eu un effet qu'en fin de période.

Cette performance de l'économie fut alimenté par le niveau très élevé de la formation brute de capital fixe des sociétés privées non-financières. La plus grande partie de cet accroissement fut concentrée dans les industries suivantes: métal, pétrole, papier, transport et équipement de transport, communications, produits chimiques et pipe-lines. Cette vigueur de la formation brute de capital fixe est apparue au moment où l'épargne des sociétés privées non-financières était à la baisse avec le résultat que les sources internes de fonds ont contribué pour 63% de l'accumulation de capital non-financier, soit une baisse par rapport à 79% à la même période en 1980.

Personal expenditures experienced a strong quarter, up 15.1% in nominal terms and 3.4% in real terms, from the second quarter of 1980. With personal disposable income rising more slowly, the personal savings rate slipped to 9.6% from 10.4% twelve months earlier. Personal expenditures on consumer durables provided strength: exemptions from the Ontario sales tax until the end of June may have advanced purchases on furniture and appliances, more than offsetting the weakness in automobile sales, where inventory accumulation continued.

Housing starts performed well during the quarter (especially in Alberta and British Columbia) averaging 224,000, substantially higher than the figure of 148,000 (seasonally adjusted at annual rates) in the second quarter of 1980.

The main negative factors in the economy's performance in the second quarter were a severe deterioration in the current account deficit of Canada's balance of international payments, mainly a result of a decline in the terms of trade, and the continuing weakness in corporate profits.

## **Interest Rates, Capital Markets and Monetary Aggregates**

The second quarter was characterised by very high interest rates, particularly at the short end of the market, producing a further accentuation of the inverse yield curve. The Bank Rate rose 248 basis points over the quarter, with most of the increase occurring in May.

The increase in interest rates in May appeared to be prompted partly by the very acute rise in rates in the United States and partly to contain too rapid a rate of growth of M1, which had exceeded the Bank's target range in April. (However, as the quarter progressed and the economy weakened, the second consideration became less important, so much so, that by the end of the quarter, M1 had dropped below the target range). The restrictive monetary policy of the Federal Reserve Board led to the federal funds rate rising 280 basis points in April and a further 253 basis points in May. The discount rate was raised a full percentage point, to 14%, on May 5th while, at the same time, the penalty for large banks who were frequent borrowers at the discount window was raised from 3% to 4%. The prime rate charged by major banks in the United States rose to 21% in May, and the federal funds rate reached 21.71% in mid-June. Other rates rose accordingly, leading to a severe narrowing of yield differentials on similar instruments between the two countries. For example, the yield differential on

Les dépenses personnelles ont montré également une certaine vigueur au cours du trimestre, en hausse de 15% en valeur nominale et 3.3% en valeur réelle, par rapport au second trimestre de 1980 (ajustement saisonnier aux taux annuels). Avec une hausse moins sensible du revenu personnel disponible, le taux d'épargne personnelle a légèrement baissé, passant de 10.4%, à même période l'an dernier, à 9.6% (ajustement saisonnier aux taux annuels). Les dépenses personnelles en biens durables ont connu aussi une fermeté relative: l'abolition de la taxe de vente en Ontario jusqu'à la fin du mois de juin a relancé l'achat de meubles et accessoires pour contrebalancer la faiblesse du secteur de l'automobile où l'accumulation d'inventaires a semblé se poursuivre.

Le nombre de constructions domiciliaires a augmenté de façon significative (principalement en Alberta et en Colombie Britannique) pour s'élever à une moyenne de 224,000 unités en hausse par rapport à 148,000 unités pour le second trimestre de 1980 (ajustement saisonnier aux taux annuels).

Les principaux facteurs négatifs, relativement à la performance économique, au cours du second trimestre ont été une sévère détérioration du déficit du compte courant de la balance canadienne des paiements internationaux, principalement due au renversement des termes de l'échange, et une faiblesse continue du niveau des profits des sociétés.

## **Taux d'intérêt, marché de capitaux et agrégats monétaires**

Le deuxième trimestre fût caractérisé par de très hauts taux d'intérêt, particulièrement sur le marché à court terme, produisant ainsi une accentuation plus marquée sur la courbe de rendement inversée. Le taux d'escompte a grimpé de 248 points de base au cours du trimestre, et la plus forte hausse s'est produite en mai.

Cet accroissement des taux d'intérêt en mai a semblé s'être accéléré en partie à cause de la très forte hausse des taux aux États-Unis et en partie pour contenir le trop fort taux de croissance de M1, qui a dépassé le niveau cible de la Banque au mois d'avril. (Cependant, comme le trimestre s'écoulait et que l'activité économique s'affaiblissait, cette deuxième considération est devenue moins importante, de telle sorte que vers la fin du trimestre, M1 était tombé en dessous du niveau cible). La politique monétaire restrictive du Bureau Fédéral de Réserve a fait progresser le taux des fonds fédéraux de 280 points de base en avril et de 253 points de base en mai. Le taux d'escompte fut haussé d'un pourcent, pour atteindre 14% le 5 mai, alors qu'au même moment, la pénalité infligée aux importantes banques qui furent de fréquents emprunteurs au guichet d'escompte fut élevée de 3% à 4%. Le taux préférentiel chargé par les principales banques aux États-Unis se chiffrait à 21% en mai et le taux des fonds fédéraux atteignait 21.71% à la mi-juin. Les autres taux ont progressé de la même façon, entraînant un sérieux rétrécissement des différentiels de rendements pour les instruments équivalents entre les deux pays. Par exemple, le différentiel

90-day finance paper in Canada over 90-day commercial paper in the United States fell from about 300 basis points at the end of March to 114 basis points by the end of May. However, by the end of June, with rates continuing to rise in Canada while they dipped in the United States, the yield differential widened to about 230 basis points.

With the narrowing of the differentials in the earlier part of the quarter, the Canadian dollar fell to 82.6 cents (U.S.) before recovering somewhat to close the quarter at 83.2 cents (U.S.). The fall of the value of the Canadian dollar against the United States dollar<sup>(1)</sup> placed a strain on Canada's international reserves. They fell \$635 million during the quarter, despite the drawing down in May of U.S. \$300 million on the Government of Canada's line of credit with Canadian chartered banks. (The suddenness of the deterioration

de rendement sur le papier financier à 90 jours au Canada et le papier commercial à 90 jours aux États-Unis, a diminué de 300 points de base qu'il était à la fin de mars à 114 points de base vers la fin de mai. Cependant, vers la fin du mois de juin, avec des taux continuant de grimper au Canada alors qu'ils baissaient aux États-Unis, le différentiel de rendement s'est à nouveau élargi pour atteindre 230 points de base.

Avec le rétrécissement des différentiels au début du trimestre, le dollar canadien est tombé à 82.6 cents (U.S.) avant de remonter, en fin de trimestre, à 83.2 cents (U.S.). Cette baisse de la valeur du dollar canadien par rapport à la devise américaine<sup>(1)</sup> a mis une certaine pression sur le niveau des réserves internationales du Canada qui ont baissé de \$635 millions au cours du trimestre, malgré la baisse, en mai, de \$300 millions sur la ligne de crédit du Gouvernement du Canada auprès des banques à charte. (Cette soudaine détérioration des réserves internationales peut être due au fait

Figure IV

# Money Supply<sup>(1)</sup> and Target Growth Rates (Seasonally Adjusted)

## L'offre de monnaie<sup>(1)</sup> et la fourchette des taux de croissance visés (Données désaisonnalisées)

(1) Currency outside banks plus Canadian dollar demand deposits at chartered banks: average of wednesdays. — Pièces métalliques et papier-monnaie hors-banque, plus les dépôts à vue libellés en dollars canadiens auprès des banques à charte: moyenne des mercredis.

(1) The Canadian dollar's apparent weakness against the United States dollar was more a function of the strength of the latter. Against most major foreign currencies, the Canadian dollar appreciated e.g. against the pound sterling (by 12%), the French franc (13%), the Deutsche Mark (12%), the Swiss franc (7%) and the Japanese yen (6%). A further indication of the strength of the United States dollar was the drop in the price of gold which fell U.S. \$90.75 to close the quarter at U.S. \$426.00.

(1) La faiblesse apparente du dollar canadien en regard de la devise américaine est davantage due à la vigueur de cette dernière. En regard de la plupart des devises étrangères, le dollar canadien s'est raffermi par rapport à la livre sterling (de 12%), au franc français (13%), au deutsche mark (12%), au franc suisse (7%) et au yen japonais (6%). Une indication supplémentaire de la vigueur du dollar américain a été la chute du prix de l'or qui est tombé de \$90.75 U.S. pour clôturer le trimestre à \$46.6.

of Canada's international reserves may be indicated from the fact that the federal government had repaid the U.S. \$300 million outstanding balance in April)<sup>(2)</sup>.

The reduction in Canada's international reserves tended to reduce liquidity, as excess Canadian dollars were purchased by the Monetary Authorities on international exchange markets, further curtailing growth in M1. It would appear that the Bank countered these developments by buying Government of Canada Treasury bills to prevent too sharp a drop in the money supply. In June, it increased its holdings of this instrument by \$841 million. However, this process would have tended to reduce interest rates. The Bank, therefore, was confronted with the difficult task of trying to prevent too fast a drop in the external value of the Canadian dollar while endeavouring to keep the money supply within its target range, which it had fallen below in June.

The increase in interest rates in Canada was very sharp. The prime rate charged by the chartered banks rose 225 basis points to an unprecedented rate of 20%, while yields on longer term instruments rose, but by a lower order. Government of Canada longer dated bonds, for example, rose 155 basis points to close the quarter at 15.03% though yields had been higher in April. The lack of sensitivity of the longer part of the market to the rapid rise in rates in the latter

que le gouvernement fédéral a remboursé ce solde en circulation de \$300 millions U.S. en avril)<sup>(2)</sup>.

La baisse des réserves internationales du Canada a contribué à réduire le niveau des liquidités, étant donné qu'un nombre excédentaire de dollars canadiens a été acheté par les autorités monétaires sur les marchés de change internationaux, diminuant davantage la croissance de M1. Il semblerait probable que la Banque du Canada a contourné ces développements en achetant des bons du trésor du Gouvernement du Canada pour prévenir une baisse trop marquée de l'offre de monnaie. En juin elle a accru ses avoirs en bons du trésor de \$841 millions. Cependant ce processus aurait eu tendance à réduire les taux d'intérêt. La banque était alors confrontée avec la tâche difficile d'essayer de prévenir une chute trop brusque de la valeur du dollar canadien tout en s'efforçant de maintenir l'offre de monnaie à l'intérieur de la cible prévue en deça de laquelle elle était tombée en juin.

L'accroissement des taux d'intérêt au Canada a été très marqué. Le taux préférentiel chargé par les banques à charte a grimpé de 225 points de base pour atteindre le taux sans précédent de 20%, tandis que les rendements des instruments à long terme ont également grimpé mais de façon plus modérée. Le rendement des obligations à longue échéance du Gouvernement du Canada, a grimpé pour sa part de 155 points de base pour clôturer le trimestre à 15.03% bien qu'il fut plus haut en avril. Le manque de sensibilité du marché à

|   | Total foreign currency assets –<br>Ensemble des avoirs en devises étrangères                                | 49,090       | 50,135       | 54,533       | 60,972       | 60,972          | 60,983     | 70,017        |
|   | Total foreign currency liabilities –<br>Ensembles des engagements en devises étrangères                     | 52,206       | 53,199       | 56,443       | 63,810       | 63,810          | 63,386     | 74,354        |
|   | Net foreign assets –<br>Avoirs nets en devises étrangères   | -3,116       | -3,064       | -1,910       | -2,838       | -2,838          | -2,403     | -4,337        |

Note: To arrive at the net foreign asset position presented in the Bank of Canada Review in Table 15, item B1809 it is necessary to add the net foreign branches of Canadian Chartered banks to the net foreign asset position stated above. For a more detailed explanation of this table see the article "A Comparison of the Foreign Currency Position of Chartered Banks as presented in the Financial Flow Accounts, the Balance of Payments and the Bank of Canada Review", *Financial Flow Accounts*, first quarter 1980.

Nota: Pour obtenir les avoirs nets en monnaies étrangères tel que présentés dans la Revue de la Banque du Canada au tableau 15, catégorie B1809, il faut ajouter à ces avoirs nets en Monnaies étrangères ceux des succursales étrangères des banques à charte canadiennes. Pour une analyse plus détaillée de ce tableau veuillez consulter l'article "Comparaison de la position en devises étrangères des banques à charte dans les Comptes des flux financiers, la Balance des paiements et la Revue de la banque du Canada", *Comptes des flux financiers*, premier trimestre 1980.

Despite the very high interest rates that persisted during the quarter, bank borrowing reached an all-time high, fuelled by borrowings to finance some very large takeovers. Most of these takeovers were in the petroleum industry and reflected the federal government's National Energy Program designed to increase resident ownership of Canada's petroleum industry. Among the larger takeovers were: Petro Canada's acquisition of more than 50% of the shares of Petrofina Canada Inc.; Dome Petroleum Limited's acquisition of Conoco Inc.'s majority holding in Hudson Bay Oil and Gas Limited (following the former's purchase of a substantial holding in Conoco Inc., which resulted in a cash and share exchange); Sulpetro Limited's acquisition of Candel Oil Ltd.; and the purchase by Canada Development Corporation of

En dépit des très hauts taux d'intérêt qui ont persisté au cours du trimestre, les emprunts bancaires ont atteint un niveau sans précédent, alimenté par des emprunts pour financer un certain nombre de larges prises de contrôle au cours du trimestre. La plupart de ces prises de contrôle se sont produites au sein de l'industrie pétrolière et sont une image de ce que contient le programme énergétique national du gouvernement fédéral conçu pour réduire la propriété étrangère de l'industrie pétrolière canadienne. Parmi les prises de contrôle figurent: l'acquisition par Petro-Canada de plus de 50% des actions de Petrofina Canada Inc.; l'acquisition par Dome Petroleum Limitée de Hudson Bay Oil and Gas, dont Conoco est l'actionnaire majoritaire (suivant l'acquisition préalable d'une part substantielle dans Conoco Inc., ce qui a amené un échange d'encaisse et d'actions); l'acquisition par Sulpetro Limitée de Candel Oil

Société Nationale Elf-Aquitaine's majority holding in Aquitaine Company of Canada Ltd. This latter purchase is included in Sub-Sector VIII.7 ("Other private financial institutions: not elsewhere included"). A non-petroleum related takeover was Noranda Mines Ltd.'s acquisition of 49.8% of the outstanding shares of MacMillan Bloedel Ltd.: this transaction was financed largely by a share exchange. Many of these borrowings were in foreign currency, producing a substantial increase in the chartered banks' foreign currency assets and liabilities (see Text Table III).

## Credit Market Developments

### Short-term Paper and Treasury Bills

Short-term paper outstanding rose \$1,585 million in the second quarter, a sharp reversal from a net decline of \$52 million the year earlier. Non-financial private corporations made \$610 million in net sales, and sales finance and consumer loan companies sold \$649 million net, their strongest quarter since 1978.

Short-term paper is frequently used by large corporations as a substitute for bank loans, depending on the price differential. As can be seen from Figure VI, bank borrowing in Canadian dollars weakened in the first two months of the quarter and borrowing via Canadian dollar bankers' acceptances increased as the price moved in favour of the latter instrument. In June, the price advantage narrowed, with the result that bankers' acceptances outstanding fell sharply.

The relative strength of short-term paper as indicated by the Financial Flow Accounts, compared with the presentation in Figure VI, may be attributable to several factors. Firstly, the chart uses only one type of instrument: 30-day Canadian dollar bankers' acceptances. The Financial Flow Accounts include in this category all paper with an original term to maturity of one year or less and the longer the term to maturity the less the responsiveness to interest rate changes.

Secondly, with the passage of the new Bank Act the use of foreign currency paper became more attractive. The reason for this change is that, since foreign currency deposits booked-in-Canada became reservable under the new Act, the interest rate to a lender offered on this type of deposit will be reduced, while a borrower will pay the same rate. Through the use of foreign currency short-term paper a lender will receive a higher interest rate as the funds are not reservable, and the borrower will pay a lower rate.

Ltd.; enfin l'achat par la Corporation de Développement du Canada de la Compagnie Aquitaine du Canada Ltée dont la Société Nationale Elf-Aquitaine est actionnaire majoritaire. Ce dernier achat est inclus dans le sous-secteur VIII.7 (autres institutions financières privées). Une autre prise de contrôle non-reliée à l'industrie pétrolière fut l'acquisition par Noranda Mines Ltée de 49.8% des actions en circulation de Macmillan Bloedel Ltée: cette transaction fut financée en grande partie par un échange d'actions. Beaucoup de ces emprunts furent libellés en devises étrangères, produisant un accroissement substantiel des actifs et passifs en monnaies étrangères des banques à charte (voir tableau explicatif III).

## Évolution du marché du crédit

### Papier à court terme et bons du trésor:

Le papier à court-terme en cours a augmenté de \$1,585 millions au deuxième trimestre ce qui représente un brusque renversement par rapport à la baisse de \$52 millions enregistrée un an plus tôt. Les sociétés privées non-financières ont fait des ventes nettes en papier à court terme de \$610 millions tandis que les sociétés de financement de ventes et de prêts à la consommation en ont vendu en valeur nette pour \$649 millions soit leur plus fort trimestre depuis 1978.

Le papier à court terme est fréquemment utilisé par les grandes sociétés comme un substitut aux prêts bancaires, tout dépendant du différentiel de prix. Comme on peut le voir à la figure VI, les emprunts bancaires en dollars canadiens ont diminué au cours des deux premiers mois du trimestre alors que les emprunts via les acceptations bancaires ont progressé étant donné que le prix les a favorisées. En juin, cet avantage a diminué avec le résultat que les acceptations bancaires en cours ont chuté significativement.

La relative vigueur du papier à court-terme telle que montrée dans les Comptes de Flux Financiers, comparée à ce que nous montre la figure VI, peut être attribuable à plusieurs facteurs. D'abord, le tableau n'utilise qu'un seul type d'instrument; les acceptations bancaires de 30 jours en dollars canadiens. Les Comptes de Flux Financiers incorporent dans cette catégorie tous les papier ayant un terme initial à maturité d'un an ou moins; plus le terme à maturité est long, moins l'instrument répond aux changements des taux d'intérêt.

Deuxièmement, avec l'entrée en vigueur de nouvelle Loi sur les banques, l'utilisation de papier en monnaie étrangère devint plus attrayante. La raison de ce changement réside dans le fait que, depuis que les dépôts en devises étrangères libellés au Canada sont sujets aux réserves selon la nouvelle Loi, le taux d'intérêt offert au prêteur sur ce type de dépôt sera réduit, tandis que l'emprunteur paiera le même taux. Le prêteur qui investit dans le papier à court terme en monnaies étrangères recevra un plus haut taux d'intérêt étant donné que les fonds ne sont pas sujets aux réserves tandis que l'emprunteur recevra un taux moins élevé.

Thirdly, a timing lag may affect the data. A large part of the increase by non-financial private corporations was reported by retail department stores (net of their captive sales finance companies which are included with sales finance and consumer loan companies) which industry has a fiscal quarter ending in April.

The Government of Canada had net new sales of Treasury bills of \$620 million in the second quarter, a substantial drop from the net increase of \$2300 million in the same period of 1980. The reduction reflected the federal government's lower borrowing requirement during the quarter: the deficit was sharply lower while the cash balances at the end of March had been very high. The main purchaser of this instrument was the Bank of Canada, which raised its holding by \$1139 million. The chartered banks raised their holdings by \$404 million.

## Loans

Strong demand for funds despite high interest rates made lenders reluctant to lock in funds for an extended period while the possibility remained that rates could move even higher. Borrowers remained at the short end of the market, perhaps in anticipation that financing costs would fall in fairly short order. As a result, variable rate borrowing remained the preferred form of financing in the second quarter.

Bank loans outstanding rose a record \$11,584 million in the quarter, one and a half times the increase in the equivalent period in 1980. The very strong growth in the quarter at a time of very high real rates of interest was attributable partly to the strength of economic activity in the earlier part of the quarter and partly to the exceptional number of very large takeovers which were largely financed through bank borrowing. Most of the increased borrowing was by non-financial private corporations (\$6447 million), federal non-financial enterprises (\$1138 million) and other private financial institutions, not elsewhere included (\$1214 million).

"Other loans" also experienced a strong quarter rising \$2126 million, almost double the increase in the second quarter of the year before. Subsidiaries of foreign banks and sales finance and consumer loan companies both showed a strong quarter.

## Bonds

The bond market in Canada suffered a further decline in the second quarter, as interest rates

Troisièmement, un différentiel de temps peut affecter les données. Une importante partie de l'accroissement de la part des sociétés privées non-financières fut enregistrée par les magasins de ventes au détail (nettes des ventes de leurs sociétés financières associées qui furent incluses dans les sociétés de financement de ventes et de prêts à la consommation), industrie dont le trimestre fiscal se termine en avril.

Le Gouvernement du Canada a effectué des ventes nettes de bons du trésor pour une valeur de \$620 millions au cours du deuxième trimestre ce qui représente une baisse significative par rapport à l'accroissement de \$2,300 millions à la même période de 1980. Cette baisse reflète la diminution des besoins en financement du gouvernement fédéral au cours du trimestre: le déficit fut en effet beaucoup plus bas tandis que les soldes d'encaisse à la fin de mars ont été très élevés. Le principal acheteur de cet instrument fut la Banque du Canada qui a augmenté ces avoirs de \$1,139 millions, (voir ci-haut). Les banques à charte ont augmenté leurs avoirs de \$404 millions.

## Prêts

Une forte demande de fonds malgré des hauts taux d'intérêt a rendu les prêteurs réticents à geler leurs avoirs pour une période étendue alors que la possibilité que les taux grimpent encore, persiste. Pour la même raison les emprunteurs restent sur le marché à court terme, en anticipant des coûts de financement moindres dans un avenir rapproché. Pour cette raison, les emprunts à taux variables sont demeurés la source préférée de financement durant le deuxième trimestre.

Les prêts bancaires en cours ont grimpé de \$11,586 millions durant le trimestre, soit une hausse de plus de la moitié comparativement à l'accroissement de la période équivalente en 1980. Cette très forte croissance au cours du trimestre, malgré de très hauts taux d'intérêt réels, fut attribuable à la vigueur de l'activité économique en début de trimestre et au nombre exceptionnel d'importantes prises de contrôle qui furent principalement financées par des prêts bancaires. La plus grande partie de l'accroissement des prêts s'est retrouvée chez les sociétés privées non-financières (\$6,447 millions), les entreprises fédérales non-financières (\$1,138 millions) et les autres institutions financières privées non-incluses ailleurs (\$1,214 million).

Les "Autres prêts" ont également connu un trimestre très vigoureux avec une augmentation de \$2,126 millions, soit un accroissement presque doublé par rapport au deuxième trimestre de l'année précédente. Les succursales de banques étrangères ainsi que les sociétés de financement de ventes et de prêts à la consommation ont toutes les deux enregistrées les plus fortes hausses au cours du trimestre.

## Obligations

Le marché des obligations au Canada a continué de décroître au deuxième trimestre, alors que les taux d'intérêt

Figure VII

# Representative Interest Rates in Canada and the United States<sup>(1)</sup>

## Taux d'intérêt représentatifs au Canada et aux États-Unis<sup>(1)</sup>

NOTES: (1) All rates are shown as at end or near end of month. — Tous les taux s'appliquent à la fin du mois ou à une période qui s'en approche.

Interest rates based on: — Les taux d'intérêt sont basés sur:

(2) Finance company paper 90-day (adjusted to 365-day true yield basis from 360-day discount basis). — Le papier à 90 jours des sociétés de financement (taux ramené d'un départ à 360 jours au rendement réel à 365 jours).

(3) Finance company paper, 90-day. — Le papier à 90 jours des sociétés de financement.

(4) International bond yields of United States dollars Eurobond issues of United States companies. — Rendements des obligations internationales pour les émissions d'euro-obligations des sociétés américaines en dollars américains.

(5) Corporate bonds industrial index (Moody's). — L'index Moody des obligations industrielles.

(6) Corporate bond yield averages, weighted, long-term (McLeod, Young, Weir and Company Limited). — Le taux moyen pondéré de rendement des obligations de sociétés (McLeod, Young, Weir and Company Limited)

continued to climb and the rate of inflation showed no abatement. Yields on all types of bonds rose by a minimum of 150 basis points. Net new marketable issues amounted to \$4321 million, a reduction of one fifth from the second quarter of 1980.

The Government of Canada sold \$485 million in net new marketable issues, about 30% of the net sales a year earlier. (The two largest issues, with an original five year term to maturity, carried an extendible feature in order to encourage sales). Net encashments of Canada Savings Bonds continued in the quarter, amounting to \$1104 million. The raising of the coupon rate by two and a half percentage points, effective from June 1st to October 31st, did not appear to slow the rate of redemption. As a result, Canada Savings Bonds outstanding amounted to \$14,708 million at the end of June, representing 15.3% of the Government of Canada's total liabilities.

ont continué de grimper et que l'inflation n'a pas semblé diminuer. Les rendements sur tous les types d'obligations ont progressé d'un minimum de 150 points de base. Les nouvelles émissions nettes négociables se sont chiffrées à \$4,321 millions, soit une baisse d'un cinquième par rapport au deuxième trimestre de 1980.

Le Gouvernement du Canada a vendu pour \$485 millions de nouvelles émissions nettes négociables ce qui représente 30% des ventes nettes de l'année précédente (les deux plus importantes émissions, ayant un terme à maturité initial de cinq ans, possédaient une possibilité de prolongement de façon à encourager les ventes). Les encaissements nets d'obligations d'épargne du Canada se sont poursuivis durant le trimestre pour se chiffrer à \$1,104 millions; la hausse de deux pourcents et demi apportée sur le taux des coupons, effective du 1<sup>er</sup> juin au 31 octobre, n'a pas semblé ralentir ces remboursements. Les Obligations d'Épargne du Canada en cours se sont chiffrées à \$14,708 millions à la fin de juin représentant 15.3% des engagements totaux du Gouvernement du Canada.

Figure VIII  
**Changes in Bonds Outstanding for the Second Quarter, 1980 and 1981**  
**Variation de l'encours des obligations pour le deuxième trimestre, 1980 et 1981**

A rising interest rate differential on bonds between Canada and the United States (see Figure VII) encouraged borrowers to place their issues abroad to a much greater extent than had characterised recent periods. Of net new marketable issues by the

La hausse des différentiels de taux d'intérêt entre le Canada et les Etats-Unis (voir figure VII) a encouragé les emprunteurs à placer leurs émissions à l'étranger dans une plus large proportion qu'au cours des périodes récentes. De toutes les nouvelles émissions nettes négociables des

provinces and their agencies, federal government enterprises and all other corporate borrowers, 55% was placed abroad, the highest percentage since 1979.

## Stocks

Stock markets in North America experienced active trading but prices remained flat over the quarter. The Toronto Stock Exchange Composite 300 Index closed the quarter at 2361.13, up only 1%. Of the more heavily weighted industry sectors, oil and gas rose 16% and consumer products 10%; metals and minerals component was virtually unchanged, while financial services and management companies fell 11% and 9%, respectively. The Standard and Poor's Composite 500 Index declined slightly to end the quarter at 131.25.

provinces ainsi que de leurs agences, des entreprises du gouvernement fédéral et des autres sociétés, 55% furent placées à l'étranger, soit le plus haut pourcentage depuis 1979.

## Actions

Le marché des actions en Amérique du Nord a été actif mais les prix sont demeurés inchangés. L'indice composite de 300 valeurs industrielles de la Bourse de Toronto a clôturé le trimestre à 2,361.13, en hausse de seulement 1%. Dans les groupes de secteurs à forte pondération, l'indice des "huiles et gaz" a grimpé de 16% et celui des produits de consommation de 10%; les secteurs des métaux et minéraux sont demeurés quant à eux virtuellement inchangés tandis que les services financiers et les entreprises d'administration ont chuté de 11% et 9% respectivement. L'Indice "Standard and Poor's Composite 500" a baissé sensiblement pour clôturer le trimestre à 131.25.

Figure IX  
Stock Price Indices — Indices des cours en bourse

The slowing of the strong price advances appeared to affect corporate decisions to go to the equity market. New stock issues amounted to \$2305 million, a substantial decline from the previous quarter when strong market conditions had encouraged the placement of \$3462 million. Non-financial private corporations placed \$1541 million in net new sales, with most of the increase coming from metal mines, mineral fuels, printing and pipelines. The chartered banks

Le ralentissement de la forte montée des prix a semblé affecter les décisions des sociétés en ce qui concerne le marché des actions. Les émissions nettes de nouvelles actions se sont chiffrées à \$2,305 millions, ce qui représente une baisse importante par rapport au trimestre précédent où de bonnes conditions de marché avaient encouragé des placements de \$3,462 millions. Les sociétés privées non-financières ont placé \$1,541 millions en nouvelles ventes nettes dont les principales se retrouvent au sein de l'industrie

raised \$335 million, continuing to increase their share capital in order to maintain a total asset to equity ratio of about 30:1 considered necessary by the industry. During an inflationary period, with associated growth in loan demand, maintenance of an adequate stock ratio requires frequent sales of equity issues.

Non-residents' holdings of Canadian shares fell for the third successive quarter, by \$335 million. The decline appeared to be related, *inter alia*, to the perceived adverse effect on non-residents of the National Energy Program which had been presented in the federal budget of October 1980. In contrast to non-residents, trustee pension plans continued to increase their holdings of equities, up some \$787 million.

## Mortgages

The level of mortgages outstanding rose \$2936 million in the second quarter, compared with an increase of \$2456 million in the same period in 1980. The net new lending, while not high by standards of the late 1970's, appeared surprisingly strong, given the increase in mortgage rates, which rose about 280 basis points during the quarter, to reach a record 18.55%. The level of housing activity held up very well during the period, particularly in the two

des mines métalliques, des combustibles minéraux, de l'imprimerie et des pipe-lines. Les banques à charte ont engendré \$335 millions pour continuer à accroître leur capital action de façon à maintenir un ratio, actif total sur les avoirs, d'à peu près 30:1 ratio jugé nécessaire par l'industrie. En période inflationniste, avec un accroissement de la demande de prêts, le maintien d'un ratio d'actions adéquat requiert des ventes fréquentes d'émissions d'actions.

Les avoirs d'actions canadiennes des non-résidents ont baissé pour le troisième trimestre consécutif d'un montant de \$335 millions. Cette chute semble reliée, entre autres, à l'effet négatif qu'a eu sur les non-résidents le Programme énergétique national qui a été présenté dans le budget fédéral en octobre 1980. Pour faire contraste à cet effet sur les non-résidents, les régimes de pension en fiducie ont continué à accroître leurs avoirs d'actions de \$787 millions.

## Hypothèques

La valeur des hypothèques en cours a augmenté de \$2,936 millions au deuxième trimestre, comparativement à un accroissement de \$2,456 millions à la même période de 1980. Les nouveaux prêts nets, bien qu'ils ne soient pas très élevés selon les critères de la fin des années 1970, furent assez importants étant donné la hausse des taux hypothécaires qui ont augmenté de 280 points de base au cours du trimestre pour atteindre un niveau record de 18.55%. L'Activité domiciliaire s'est très bien comportée au cours du trimestre,

Figure X

Westernmost provinces, though starts, particularly for multiples, peaked in April and declined somewhat in May and June. This decline may become more pronounced as some of the financing may have been arranged at lower rates than those prevailing at the end of the quarter. A drop in housing activity, and hence net new mortgage borrowing, may be anticipated.

## Consumer Credit

Consumer credit demonstrated substantial strength in the second quarter of 1981, rising \$2093 million. The increase was substantially in accordance with the considerable growth of consumer expenditure on durables during the period, and was in line with the Financial Flow Accounts model of consumer credit. In this model, the flow of consumer credit is hypothesized to be an increasing function of the expenditure on consumer durables and a decreasing function of cost of credit (represented by the prime rate charged by the chartered banks); dummy variables are used in the specification to adjust for seasonality.

Most of the increased borrowing appeared to have occurred in the earlier months of the quarter. As the economy and consumer expenditures weakened in

particulièrement dans les deux provinces les plus à l'ouest du pays, bien que ces mises en chantier, surtout pour les unités à plusieurs logements, aient atteint leur plus haut niveau en avril pour décroître quelque peu en mai et juin. Ce déclin pourrait devenir plus important encore si une partie du financement a été négocié à des taux plus bas que ceux en vigueur à la fin du trimestre. Une baisse de l'activité domiciliaire, et, par conséquent, des emprunts hypothécaires nets pourrait être alors anticipée.

## Crédit à la consommation

Le crédit à la consommation a montré une certaine vigueur au cours du deuxième trimestre de 1981, s'accroissant de \$2,093 millions. Cet accroissement fut en accord avec la hausse considérable des dépenses de consommation en biens durables au cours de la période, et fut en ligne directe avec le modèle de crédit à la consommation des comptes de flux financiers. Dans ce modèle, le flux de crédit à la consommation est hypothétiquement posé comme étant une fonction croissante des dépenses en biens de consommation durables et une fonction décroissante du coût du crédit (représenté par le taux préférentiel chargé par les banques à charte); des variables auxiliaires sont utilisées dans la spécification du modèle pour tenir compte de la saisonnalité.

La majeure partie de l'accroissement des emprunts semblerait s'être produite en début de trimestre. Comme l'activité économique et les dépenses de consommation ont

June in the face of the higher rates of interest consumer credit followed suit. The major suppliers of funds were the chartered banks (\$1240 million). Life insurance policyholders continued to take advantage of clauses in their policies permitting borrowing at rates substantially below market, contributing \$197 million to the flow of consumer credit.

diminuées en juin face à des taux élevés, le crédit à la consommation a suivi. Les principaux fournisseurs de fonds furent les banques à charte (\$1,240 millions). Les détenteurs de polices d'assurance vie ont continué de tirer profit des clauses de leurs polices permettant d'emprunter à des taux significativement inférieurs au marché, ce qui a contribué à alimenter le flux de crédit à la consommation de \$197 millions.

## THE RELATIONSHIP BETWEEN THE NATIONAL INCOME AND EXPENDITURE ACCOUNTS (CAPITAL FINANCE ACCOUNTS) AND THE FINANCIAL FLOW ACCOUNTS

The capital finance accounts, as set out in the National Income and Expenditure (NIEA), record the saving and investment transactions of each sector of the economy. The net lending or borrowing of each sector, representing the surplus or deficit of the sector's saving over its requirements for non-financial capital acquisition, provides the basic link to the Financial Flow Accounts (FFA) which go beyond the NIEA by setting out the acquisition of financial assets and issuance of financial liabilities which underlie this net lending and borrowing. Text Table IV is a condensed version of what appears as the real accounts (categories 1100 to 1900) in the financial flows matrix (Tables 1-1 to 1-4, pp. 2-9).

**Sectoring.** The sector breakdown presented in the Financial Flow Accounts (41 sectors and subsectors) is more detailed than that presented in the NIEA (four sectors) but the two are fully reconcilable. Text Table IV shows the four NIEA sector names and, in roman numerals, the corresponding component FFA sectors and subsectors.

**Reconciliation of annual data.** The annual National Income and Expenditure Accounts (Catalogue 13-201), published in November, includes consolidated capital finance accounts in Table 10 (source) and Table 11 (disposition). These two tables summarize the Capital Finance Accounts which are in turn derived from the Income and Outlay Accounts of each of the four sectors as presented in Tables 12 through 27. The numbers appearing in parentheses beside the FFA category name in Text Table IV are the line numbers in which corresponding data appear in Table 10 (source) and Table 11 (disposition).

The Capital Finance Accounts of the NIEA do not include the FFA category Net Purchases of Existing and Intangible Assets as a separate item. It is the sum of the two FFA categories Net Lending or Borrowing (1900) plus Net Purchases of Existing and Intangible Assets (1800) which equals the surplus of sectoral saving over disposition as reported in the NIEA.

**Rest of the world or non-resident sector.** The item "Net inheritance and migrants funds", which is a component of the current account in the Canadian Balance of International Payments, is considered to be a capital transfer in the NIEA and FFA; as such, it is reported as Category 1800 of the Rest of the World Sector of the FFA. Category 1900, Net Lending or Borrowing, thereafter equals the net deficit or surplus of Canada (net surplus or deficit of the Rest of the World) on current account as per the Canadian Balance of International Payments.

## RELATION ENTRE LES COMPTES NATIONAUX DES REVENUS ET DES DÉPENSES (LES COMPTES DE FINANCEMENT DU CAPITAL) ET LES COMPTES DES FLUX FINANCIERS

Les comptes de financement du capital, tel que définis dans les comptes nationaux des revenus et dépenses (CNRD), enregistrent l'épargne et les transactions d'investissement pour chaque secteur de l'économie. Le niveau de prêt ou d'emprunt nets de chaque secteur, représentant le surplus ou déficit de l'épargne du secteur sur ses besoins d'acquisition de capital non-financier, fourni le lien de base aux comptes des flux financiers (CFF) qui vont au delà des CNRD en établissant l'acquisition des actifs financiers et la source des passifs financiers qui sont la base du niveau de prêt ou d'emprunt nets. Le tableau IV présente une version condensée de ce qui apparaît dans les comptes réels (catégories 1100 à 1900) de la matrice des flux financiers (tableaux 1-1 à 1-4, p.2-9).

**Par secteur.** L'analyse sectorielle présentée dans les comptes de flux financier (41 secteurs et sous-secteurs) est plus détaillée que celle présentée dans les CNRD (4 secteurs) mais les deux sont entièrement réconciliables. Le tableau IV montre les 4 noms de secteur et, en chiffres romains, la composante correspondante des secteurs et sous-secteurs des CFF.

**Réconciliation de données annuelles.** La publication annuelle des *Comptes Nationaux des Revenus et des dépenses* (n° 13-201 au catalogue), publiée en novembre, inclut dans les tableaux 10(source) et 11(utilisation), les comptes de financement de capital dans leur ensemble. Les deux tableaux résument les comptes de financement de capital qui sont à leur tour dérivés des comptes de revenus et dépenses pour chacun des quatre secteurs tels que présentés dans les tableaux 12 à 27. Les nombres entre parenthèses à côté du nom de la catégorie des CFF du tableau IV, sont les nombres pour lesquels il existe des données correspondantes dans les tableaux 10(source) et 11(utilisation).

Les comptes de financement de capital des CNRD ne comprend pas la catégorie "Achats Nets d'Actifs Existants et Intangibles" des CFF mais condense plutôt la somme de deux catégories des CFF Emprunt ou prêt net (1900) plus Achats Nets d'Actifs Existants et Intangibles (1800) qui correspond au surplus d'épargne par secteur sur l'utilisation telle que reportée dans les CNRD.

**Reste du monde ou secteur des non-résidents.** L'Item "Succession Nette et capitaux des migrants" qui est une composante du compte courant de la Balance Canadienne des Paiements Internationaux, est vu comme un transfert de capital dans les CFF et les CNRD; il est, par conséquent, reporté à la catégorie 1800 du secteur du Reste du Monde des CFF. La catégorie 1900, Prêt ou emprunt nets, est, de ce fait, équivalente au déficit ou surplus net du Canada (Surplus ou déficit net du Reste du Monde) au compte courant de la Balance Canadienne des Paiements Internationaux.

VOIR NOTES A LA PAGE PRECEDENTE.

**Reconciliation of quarterly data.** The quarterly National Income and Expenditure Accounts (Catalogue 13-001) do not present a complete set of sector capital finance accounts. In particular, gross fixed capital formation is not broken down between the incorporated versus the unincorporated business sectors. In the FFA the quarterly split is estimated using the ratio of the latest annual data. The sectoral split for Capital Consumption Allowances and Miscellaneous Valuation Adjustments (CCA-1200) is based on unpublished data.

For the Persons and Unincorporated Business Sector, figures corresponding to Net Saving (1400) can be found as lines one plus two in Table 8 of the quarterly NIEA and the Value of Physical Change in Inventories (VPCI-1700) appears in Table 2, line 15. For the Corporate and Government Business Enterprise Sector, Net Saving (1400) equals the sum of lines three, four, five and six of Table 8. VPCI appears as line 14 of Table 2. For the Government Sector, Table 6 reports Net Saving (1400) on line 85 and CCA (1200) as line 92 while Gross Fixed Capital Formation (GFCF-1600) and VPCI are reported on lines four and 13 respectively of Table 2. Finally, the Rest of the World Sector is covered in Table 7: line 11 equals Net Saving (1400) with sign reversed and line 12 equals Net Purchases of Existing and Intangible Assets (1800).

**Réconciliation des données trimestrielles.** La publication trimestrielle, Comptes Nationaux des Revenus et des dépenses (n° 13-001 au catalogue) ne présente pas un ensemble complet de secteur des comptes de financement de capital. En particulier, la formation brute de capital fixe n'est pas séparée entre les secteurs d'entreprises incorporées ou non incorporées. Dans les CFF cette distinction trimestrielle est estimée en utilisant un ratio basé sur les données annuelles les plus récentes. En ce qui concerne la catégorie 1200 (Provisions pour consommation de capital et ajustements divers) la séparation par secteur est basée sur des données non publiées.

Pour le secteur des particuliers et entreprises non constituées en sociétés, les données correspondant à l'épargne nette (1400) peuvent être trouvées à partir des lignes une plus deux dans le tableau 8 des CNRD (publication trimestrielle). De même la valeur de la variation matérielle des stocks (VVMS-1700) apparaît au tableau 2, ligne 15. Pour le secteur des corporations et entreprises commerciales publiques, l'épargne nette (1400) est égale à la somme des lignes trois, quatre, cinq et six du tableau 8. VVMS (1700) apparaît à la ligne 14 du tableau 2. Pour le secteur gouvernemental, le tableau 6 montre l'épargne nette (1400) à la ligne 85 et la PCC (1200) à la ligne 92 tandis que la Formation brute de Capital fixe (FBCF-1600) et la VVMS (1700) sont reportés respectivement aux lignes quatre et 13 du tableau 2. Finalement, le secteur du Reste du Monde est couvert au tableau 7 avec la ligne 11 équivalente à l'épargne nette (1400) avec signes opposés et la ligne 12 équivalente à l'Achat Net d'Actifs Existants et Intangibles (1800).

## **NOTES ON DATA QUALITY IN THE FINANCIAL FLOW ACCOUNTS, WITH JUDGEMENTAL RATINGS OF OVERALL QUALITY, BY SECTOR**

It is not possible to calculate estimates of the margin of error for the financial flows estimates similar to the sampling error or confidence intervals which can be calculated for estimates based on random samples. However, it is possible for someone familiar with the Financial Flow Accounts to rate the data quality, at least in a fairly rough and subjective way. Such estimates are a useful guide to the relative quality of different components of the Accounts, but they cannot be made precise. The following notes and letter grades (A or good, B or fair, C or poor) are therefore offered by way of an informed opinion of the relative overall quality of the data for each sector.

### **Sector and Grade**

#### **I and II: Persons and Unincorporated Business — C**

Most of the category data in this sector are calculated residually and consequently errors in any other sector of the Financial Flow Accounts will be reflected in Sectors I and II. There are two major categories in which data are of good quality: “life insurance and pensions” assets and the liability item “consumer credit”.

#### **III: Non-Financial Private Corporations — B**

Data are based on a quarterly survey in which all large companies (assets of \$10 million or more) report. The overall quality is significantly reduced because of the lack of an adequate sample and accurate response by small companies (assets less than \$10 million) which represent 30% of total assets. Since these smaller corporations rely on bank financing to a disproportionate extent, the quality of data on bank loans and some other categories is low.

#### **IV.1: Non-Financial Government Enterprises: Federal — B**

Data are based on unstructured balance sheets (level data) and therefore no flow adjustments can be made to account for valuation changes, etc. Allocation of balance sheet items to Financial Flow Accounts categories is sometimes done on a judgemental basis. Universe coverage is good.

#### **IV.2: Non-Financial Government Enterprises: Provincial — B**

Data are based on a variety of sources but universe coverage is fairly good. Some flow adjustments are made where data quality permit.

## **REMARQUES SUR LA QUALITÉ DES DONNÉES DES COMPTES DE FLUX FINANCIERS, ET ÉVALUATION CRITIQUE DE LA QUALITÉ GLOBALE PAR SECTEUR**

Il n'est pas possible de calculer des estimations de la marge d'erreur pour les estimations des flux financiers qui soient semblables à l'erreur d'échantillonnage ou aux intervalles de confiance que l'on peut calculer pour des estimations utilisant des échantillons aléatoires. Toutefois, une personne qui connaît quelque peu les comptes de flux financiers peut évaluer la qualité des données, au moins d'une façon assez approximative et subjective. De telles estimations constituent un guide utile pour la qualité relative des différentes composantes des comptes, mais il est impossible de les rendre précises. Les remarques qui suivent, ainsi que la classification littérale (A ou bon, B ou moyen, C ou faible) proviennent par conséquent d'une opinion informée de la qualité générale relative des données pour chaque secteur.

### **Secteur et classification**

#### **I et II: Particuliers et entreprises non constituées en sociétés — C**

La plupart des données pour ce secteur sont calculées de façon résiduelle et par conséquent des erreurs entachant tout autre secteur des comptes de flux financiers se retrouveront dans les secteurs I et II. Il y a deux catégories principales dont les données sont de bonne qualité: L'actif “assurances-vie et rentes” et le poste de passif “crédit à la consommation”.

#### **III: Entreprises publiques non financières — B**

Les données sont établies à partir d'une enquête trimestrielle à laquelle répondent toutes les grandes compagnies (actif d'au moins \$10 millions). La qualité générale se trouve sensiblement réduite en raison de l'inexistence d'un échantillon approprié et d'une réponse précise de la part des compagnies plus petites (actif inférieur à \$10 millions), qui comptent pour 30 % de l'actif total. Comme ces sociétés moins importantes utilisent le financement bancaire de façon disproportionnée, la qualité des données sur les prêts bancaires et sur quelques autres catégories est faible.

#### **IV.1: Entreprises publiques non financières: fédérales — B**

Les données sont établies à partir de bilans non structurés (données de stocks), et il est par conséquent impossible d'apporter des corrections de flux pour tenir compte des changements d'évaluation, etc. L'affectation des postes du bilan aux catégories de comptes de flux financiers se fait parfois au jugé. Le champ d'observation de l'univers est bon.

#### **IV.2: Entreprises publiques non financières: provinciales — B**

Les données sont établies à partir de diverses sources, mais le champ d'observation de l'univers est assez bon. Certaines corrections de flux sont apportées lorsque la qualité des données l'autorise.

### **IV.3: Non-Financial Government Enterprises: Local — C**

Coverage, timing and quality of reported data are all relatively poor, as there is no structured sample survey of this sector. Some components of the universe, such as telephone, gas and electric utility local government enterprises, are well covered by annual surveys but these data are only available after a lag of several years.

### **V: Monetary Authorities — A**

The quality of data recorded by the Bank of Canada, the Exchange Fund Account and the other monetary authorities is good in terms of both coverage and timeliness of reporting.

#### **VI.1: Chartered Banks — A**

The major problem with this sub-sector, for which the data are otherwise very good, is that data are not reported on a booked-in-Canada basis (i.e., domestic operations only). Some estimates are made in order to put the data on this basis. Full universe coverage is ensured by the regulatory authorities (Inspector General of Banks, Bank of Canada) from whom the data are obtained.

#### **VI.2.1,2.3,2.4: Near-Banks — A**

The quality and coverage of all three sub-sectors are good. Trust Companies (VI.2.3) and Mortgage Loan Companies (VI.2.4) submit data on structured questionnaires in response to a quarterly survey with very high coverage. The sole Quebec Savings Bank (VI.2.1) submits balance sheet data to the regulatory authorities.

#### **VI.2.2: Credit Unions and Caisses Populaires — B**

Credit unions and Caisses Populaires (VI.2.2) submit data to their provincial centrals which in turn submit data to Statistics Canada. While coverage and quality are good, overall, data are often late by one or more quarters for several provinces. This necessitates estimation for the current quarter but figures are later revised. Therefore, current quarter estimates should be rated B (fair) whereas, after revision, the data are A (good).

#### **VII.1: Life Business of Life Insurance Companies and Fraternal Benefit Societies — A**

#### **VII.2: Segregated Funds of Life Insurance Companies — A**

Data are submitted in response to a quarterly survey on a structured questionnaire which parallels the reporting requirements of the regulatory authorities (Superintendent of Insurance). Coverage, quality and timeliness are good.

### **IV.3: Entreprises publiques non financières: locales — C**

Le champ d'observation, le délai et la qualité des données déclarées sont tous relativement médiocres, car il n'y a pas d'enquête par échantillonnage structurée pour ce secteur. Certains éléments de l'univers, comme les entreprises de téléphone, de gaz et d'électricité des administrations locales, sont bien étudiées lors d'enquêtes annuelles, mais ces données ne sont disponibles qu'après plusieurs années.

### **V: Autorités monétaires — A**

La qualité des données rapportées par la Banque du Canada, le Fonds des changes et les autres autorités monétaires est bonne en termes à la fois des champs d'observation et des délais de déclaration.

#### **VI.1: Banques à charte — A**

Le principal problème de ce sous-secteur, dont par ailleurs les données sont très bonnes, est que les données ne sont pas déclarées sur une base de comptabilisation au Canada (c.-à-d. les opérations intérieures seulement). On fait quelques estimations afin d'aligner des données sur cette base. L'exhaustivité du champ d'observation est garantie par les organismes de réglementation (Inspecteur général des banques, Banque du Canada), qui communiquent les données.

#### **VI.2.1,2.3,2.4: Quasi-banques — A**

La qualité et le champ d'observation des trois sous-secteurs sont bons. Les sociétés de fiducie (VI.2.3) et les sociétés de prêts hypothécaires (VI.2.4) présentent des données sur des questionnaires structurés en réponse à une enquête trimestrielle ayant un champ d'observation très poussé. La seule banque d'épargne de Québec (VI.2.1) présente des données de bilan aux organismes de réglementation.

#### **VI.2.2: Caisses populaires et caisses d'épargne et de crédit — B**

Les caisses d'épargne et de crédit et les caisses populaires (VI.2.2) soumettent les données à leurs centrales provinciales qui, à leur tour, fournissent les données à Statistique Canada. Bien que le champ d'observation et la qualité soient bons, dans l'ensemble, les données sont souvent en retard d'un ou plusieurs trimestres dans le cas de plusieurs provinces. Il faut donc procéder à des estimations pour le trimestre en cours, mais les chiffres sont ensuite révisés. Par conséquent, les estimations du trimestre courant doivent être classées B (moyennes) tandis que, après révisions, les données sont A (bonnes).

#### **VII.1: Opérations en assurance-vie des sociétés d'assurance-vie et de secours mutuels — A**

#### **VII.2: Caisses séparées des sociétés d'assurance-vie — A**

Les données sont recueillies lors d'une enquête trimestrielle utilisant un questionnaire structuré qui suit les exigences de déclaration des organismes de réglementation (Surintendant des assurances). Le champ d'observation, la qualité et les délais sont bons.

### **VII.3: Trusteed Pension Funds — A**

A large sample of funds submit quarterly data on a structured questionnaire. Full universe coverage is obtained annually, at which time revisions are made to the formerly estimated fraction of the universe.

### **VIII.1-6: Other Private Financial Institutions — A**

In all sub-sectors, respondents submit data on structured questionnaires. Coverage, quality and timeliness are good.

### **VIII.7: Other Private Financial Institutions: Other, n.e.i. — B**

This sub-sector includes holding companies, closed end funds, venture capital companies, finance leasing companies and other business finance (including subsidiaries of foreign banks). Universe coverage is not very good for holding companies. However, respondents do submit data on structured forms.

### **IX: Public Financial Institutions — B**

Coverage of this group of institutions, although fairly high, relies on unstructured returns from which financial flow categories must be derived. In the case of many of the smaller institutions in IX.2 (Provincial) only annual data are available. The total universe is relatively small. For federal government enterprises only level data are available and therefore no flow adjustments can be made for valuation changes, etc.

### **X: Federal Government — B**

Coverage and timeliness are good. Data are only available in level terms and therefore flow adjustments for valuation changes, etc., are not always possible. The government does not submit data on structured forms and there are sometimes difficulties in allocating balance sheet items to the appropriate Financial Flow Accounts category. Certain major data categories such as treasury bills and Government of Canada bonds present data of high quality.

### **XI.1: Provincial Government — B**

Coverage is good with timeliness somewhat less satisfactory than for the Federal Government. The level of detail available is less than sufficient to enable ready translation to Financial Flows Accounts categories. This results from lack of structured questionnaires and the difficulty of estimating flows on an accrual rather than cash basis.

### **VII.3: Régimes de pensions en fiducie — A**

Un important échantillon de régimes présente des données trimestrielles sur un questionnaire structuré. Il y a observation exhaustive de l'univers chaque année, mais à ce moment-là, on apporte des révisions à la fraction préalablement estimée de l'univers.

### **VIII.1-6: Autres institutions financières privées — A**

Pour tous les sous-secteurs, les répondants déclarent les données sur des questionnaires structurés. Le champ d'observation, la qualité et les délais sont bons.

### **VIII.7: Autres institutions financières privées n.c.a. — B**

Ce sous-secteur regroupe les sociétés de portefeuille, les sociétés d'investissement à capital fixe, les sociétés à capital de risque, les compagnies de financement de crédit-bail et les autres entreprises financières commerciales (y compris les filiales des banques étrangères). Le champ d'observation n'est pas très bon dans le cas des sociétés de portefeuille. Toutefois, les répondants soumettent les données sur des formules structurées.

### **IX: Institutions financières publiques — B**

Le champ d'observation de ce groupe d'institutions, même s'il est assez poussé, utilise des déclarations non structurées à partir desquelles il faut calculer les catégories de flux financiers. Dans le cas d'un grand nombre d'institutions plus petites du sous-secteur IX.2, on ne dispose que de données annuelles. L'univers total est relativement petit. Dans le cas des entreprises fédérales, on ne dispose que de données de stocks, et par conséquent, il est impossible d'apporter des corrections de flux dans le cas des changements d'évaluation, etc.

### **X: Administration publique fédérale — B**

Le champ d'observation et les délais sont bons. On ne dispose que de données de stocks, et par conséquent il n'est pas toujours possible d'apporter des corrections de flux pour les changements d'évaluation. L'administration ne présente pas les données sur des formules structurées, et il y a parfois des problèmes lorsqu'il s'agit d'affecter des postes de bilan à la catégorie des comptes de flux financiers appropriée. Certaines catégories importantes de données, comme les bons du Trésor et les obligations du gouvernement du Canada, fournissent des données de haute qualité.

### **XI.1: Administrations publiques provinciales — B**

Le champ d'observation est bon et les délais sont un peu moins satisfaisants que dans le cas de l'administration fédérale. Le niveau de détail existant est moins que suffisant pour permettre une conversion rapide en termes des catégories des comptes de flux financiers. Cette situation s'explique par l'absence de questionnaires structurés et la difficulté d'estimer des flux sur une base de comptabilité d'exercice plutôt que de caisse.

## **XI.2: Local Governments — C**

Data are based on a number of separate surveys and coverage is incomplete; currently available data are insufficiently detailed and there are difficulties in estimating data on an accrual basis. Acquisition of accurate data is complicated by the fact that much municipal financing is carried out under several different funds which must be integrated, e.g. general revenue funds, general capital and loan funds, sinking funds, reserve funds.

## **XI.3: Hospitals — C**

Respondents file structured questionnaires and coverage is good but there is a serious problem of lack of timeliness. Data are often estimated, at least in part, for several years until actual data for the reference period become available.

## **XII: Social Security Funds — A**

Data are based on transactions of the Canada Pension Plan and the Quebec Pension Plan only. Quarterly estimates are available and are related principally to two financial flow categories.

## **XIII: Rest of the World — B**

Data presented in the Financial Flow Accounts are essentially a restatement of Balance of Payments data which in turn are based on a variety of sources. Some data are based on direct surveys, which in many cases offer less than complete coverage. Other data are based on information gathered for other than Balance of Payments purposes. Some categories (e.g., official reserves transactions) present data of very high quality. In other categories (e.g., trade credit, mortgages) data are either lacking or coverage is very incomplete.

## **XI.2: Administrations publiques locales — C**

Les données utilisent un certain nombre d'enquêtes distinctes et le champ d'observation est incomplet. Les données actuellement disponibles ont un niveau de détail insuffisant, et il y a des difficultés d'estimation des données sur une base de comptabilité d'exercice. L'acquisition de données précises se trouve compliquée par le fait qu'une grande partie du financement des municipalités s'effectue par l'entremise de plusieurs fonds différents qui doivent être intégrés, comme par exemple les fonds de recettes générales, les fonds de capital général et de prêts, les fonds d'amortissement, les fonds de réserve.

## **XI.3: Hôpitaux — C**

Les répondants utilisent des questionnaires structurés et le champ d'observation est bon, mais il y a un problème sérieux de délai. Les données sont souvent estimées, au moins en partie, pendant plusieurs années jusqu'à ce que les données réelles pour la période de référence parviennent enfin.

## **XII: Caisses de sécurité sociale — A**

Les données sont établies à partir des opérations du Régime de pensions du Canada et du Régime de rentes du Québec. Il existe des estimations trimestrielles, qui se rapportent principalement à deux catégories des flux financiers.

## **XIII: Reste du monde — B**

Les données figurant dans les comptes de flux financiers sont essentiellement une reprise des données de la balance des paiements, lesquelles utilisent une foule de sources. Certaines données proviennent d'enquêtes directes, qui souvent offrent un champ d'observation incomplet. D'autres données sont établies à partir de renseignements recueillis pour des fins autres que la balance des paiements. Certaines catégories (par exemple, les opérations sur réserves officielles) offrent des données de très haute qualité. Pour d'autres catégories (ex.: crédit commercial, hypothèques), les données sont soit inexistantes ou ont un champ d'observation très incomplet.

## OTHER PUBLICATIONS

### **Annual Flows and Year-end Financial Assets and Liabilities, 1961-1979, Catalogue 13-563**

Included in this publication are annual matrices for financial flows and year-end outstandings as well as time series for both year-end outstandings and annual flows for all sectors and subsectors.

### **Financial Flow Accounts: Volume 1, Quarterly Flow Estimates, 1962-1975, Catalogue 13-562**

This publication includes annual matrices, quarterly time series for all sectors and subsectors, time series for all of the major categories, as well as time series for the summary credit market activity table.

### **Occasional Articles**

Articles which have appeared in the Financial Flow Accounts publication on an occasional basis are available on request, from the Financial Flows Section.

### **Article Previously Published**

Registered Retirement Savings Plans in the Financial Flow Accounts, third quarter 1975.

Seasonality in the Financial Flow Accounts, fourth quarter 1975.
